

| CRYDSAT | IDEAS Daily Report for IO | P data: 24/04/2014 | IDEAS Y | |
|---|---|---|---|--|
| 1. Overview | | | | |
| Report Production Date: Data Used: | 28-Apr-2014 Intermediate Ocean Products (IOP) L1B and L2 Science Data | Check Server check: science-pds.cryosat.esa.int Server check: calval-pds.cryosat.esa.int Product Software Check Product Format Check Product Header Analysis Auxiliary Data File Usage Check Auxiliary Correction Error Check Measurement Confidence Data Check | Status Nominal Nominal Nominal Nominal Nominal Nominal See Section 4.5, 4.6, 5.5 and 5.6 | |
| Mission / Instrument News23-Apr-2014None24-Apr-2014None25-Apr-2014Nothing planned | d | | | |
| 2. Global Coverage | | | | |
| <image/> | | | | |
| Mode Coverage LRM SAR | | | | |
| 3. Instrument Configuration | | | | |
| The SIRAL instrument configuration for the day of acquisition is provided below. | | | | |
| SIRAL instrument(s) in use: SIRAL - A | | | | |

4. IOP Level 1B Data Quality Check

4.1 L1B Product Format Check

Each product, retrieved and unpacked from the science server, is checked to ensure it consists of both an XML header file (.HDR) and a binary product file (.DBL). 0

Number of products with errors:

4.2 L1B Product Header Analysis

For all products, a series of pre-defined checks are performed on the MPH and SPH in order to identify any inconsistencies and/or errors raised by the ground-segment processing chain.

| 4.3 L1B Auxilary Data File Usage Check | | | | | |
|--|---|--|--|--|--|
| Each product is checked for missing Data Set Descriptors with repsect to a pre-det Number of products with errors: 0 | ermined baseline and also to check the v | alidity of Auxiliary Data Files is correct. | | | |
| 4.4 L1B Auxiliary Correction Error Check | | | | | |
| Each product is checked to detect auxiliary corrections flagged by the ground-static Number of products with errors: 0 | on processing chain as missing or contain | ing errors. | | | |
| 4.5 L1B Measurement Confidence Data Check | | | | | |
| CryoSat L1B data includes a measurement confidence flag (field 12) for each measurement record. The bit value of this flag indicates any problems when set. Number of products with errors: 1 | | | | | |
| Product | Test Failed | Description | | | |
| CS_OFFL_SIR_IOP_1B_20140424T194421_20140424T195832_B001 | Power scaling error | There has been an error in the scaling of the L1B waveform | | | |
| 4.6 L1B Waveform Group Data Check | | | | | |
| CryoSat L1B data includes a waveform data flag (field 65) for each measurement record. The bit value of this flag indicates any problems when set. | | | | | |
| Loss of Echo Flag: This flag is currently set for a large number of products over land, indicating that the tracking echo is missing. | | | | | |
| Number of products with errors: 49 | | | | | |
| 5. IOP | Level 2 Data Quality Ch | eck | | | |
| 5.1 L2 Product Format Check | | | | | |
| | re it consists of both an YML beader file (| HDP) and a binany product file (DPI) | | | |
| Each product, retrieved and unpacked from the science server, is checked to ensure it consists of both an XML header file (.HDR) and a binary product file (.DBL) Number of products with errors: 0 | | | | | |
| 5.2 L2 Product Header Analysis | | | | | |
| For all products, a series of pre-defined checks are performed on the MPH and SPH in order to identify any inconsistencies and/or errors raised by the ground-segment processing chain. Number of products with errors: 0 | | | | | |
| 5.3 L2 Auxiliary Data File Usage Check | | | | | |
| Each product is checked for missing Data Set Descriptors with respect to a pre-determined baseline and also to check the validity of Auxiliary Data Files is correct. Number of products with errors: 0 | | | | | |
| 5.4 L2 Measurement Confidence Data Check | | | | | |
| CryoSat L2 data includes a quality flag (field 14) for each 20-Hz measurement record. The bit value of this flag is an assessment of the measurement quality by the processing chains. Number of products with errors: 0 | | | | | |
| 5.5 L2 Range Measurement Check | | | | | |
| Each product is checked to detect range measurements flagged by the processing chain as missing or containing errors. | | | | | |
| Ocean Range Averaging Status Flag: This flag is currently set for products over land and sea ice, but this is to be expected. | | | | | |
| Ice Range Averaging Status Flag: This flag is currently set for some products over land and continental ice. | | | | | |
| Number of products with errors: 229 | | | | | |
| 5.6 L2 SWH and Backscatter Measurement Check | | | | | |
| Each product is checked to detect parameters related to SWH and sigma0 that are flagged by the processing chain as missing or containing errors. | | | | | |
| SWH Averaging Status Flag: This flag is currently set for products over land and sea ice, but this is to be expected. | | | | | |

Ocean Backscatter Averaging Status Flag: This flag is currently set for products over land and sea ice, but this is to be expected.

Ice Backscatter Averaging Status Flag: This flag is currently set for some products over land and continental ice. 193

Number of products with errors:
