product is checked for missing Data Set Descriptors with repsect to a p		
	pre-determined baseline and also to ch	eck the validity of Auxiliary Data Files is correct.
ber of products with errors: 0		
L1B Auxiliary Correction Error Check		
product is checked to detect auxiliary corrections flagged by the ground	d-station processing chain as missing of	or containing errors.
ber of products with errors: 0		
L1B Measurement Confidence Data Check		
Sat L1B data includes a measurement confidence flag (field 12) for eac	h measurement record. The bit value o	of this flag indicates any problems when set.
ber of products with errors: 4

5.6 L2 SWH and Backscatter Measurement Check

Each product is checked to detect parameters related to SWH and sigma0 that are flagged by the processing chain as missing or containing errors.

SWH Averaging Status Flag: This flag is currently set for products over land and sea ice, but this is to be expected.

Ocean Backscatter Averaging Status Flag: This flag is currently set for products over land and sea ice, but this is to be expected.

Ice Backscatter Averaging Status Flag: This flag is currently set for some products over land and continental ice.

Number of products with errors:
