

IDEAS+ Daily Report for IOP data:

04/09/2014

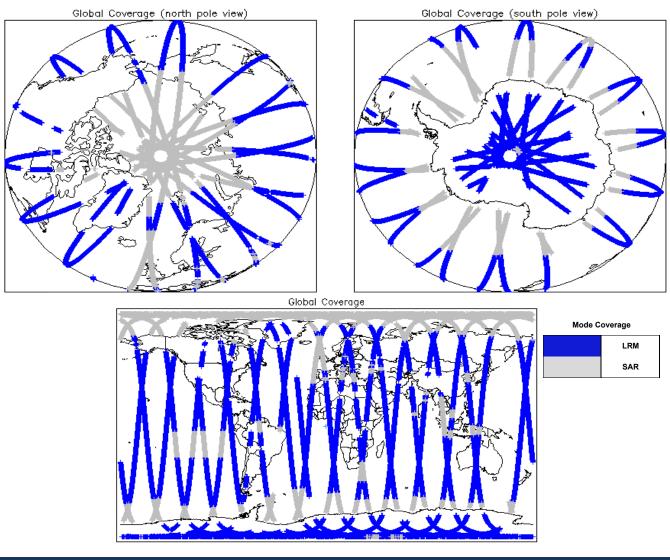

Mission / Instrument News

03-Sep-2014 SIRAL unavailability on 3-September-2014 from 06:55:00 (SARIn Rx2 from 04:57:59) to 10:37:02 due to planned on-board maintentance operations. None

05-Sep-2014 Nothing planned

2. Global Coverage

3. Instrument Configuration

The SIRAL instrument configuration for the day of acquisition is provided below.

SIRAL instrument(s) in use: SIRAL - A

4. IOP Level 1B Data Quality Check

4.1 L1B Product Format Check

Each product, retrieved and unpacked from the science server, is checked to ensure it consists of both an XML header file (.HDR) and a binary product file (.DBL).

Number of products with errors:

4.2 L1B Product Header Analysis

For all products, a series of pre-defined checks are performed on the MPH and SPH in order to identify any inconsistencies and/or errors raised by the ground-segment processing chain.

Number of products with errors:

4.3 L1B Auxilary Data File Usage Check			
Each product is checked for missing Data Set Descriptors with repsect to a pre-determined baseline and also to check the validity of Auxiliary Data Files is correct. Number of products with errors: 0			
4.4 L1B Auxiliary Correction Error Check			
Each product is checked to detect auxiliary corrections flagged by the ground-station processing chain as missing or containing errors. Number of products with errors: 0			
4.5 L1B Measurement Confidence Data Check			
CryoSat L1B data includes a measurement confidence flag (field 12) for each measurement record. The bit value of this flag indicates any problems when set.			
Number of products with errors: 2			
Product		Test Failed	Description
CS_OFFL_SIR_IOP_1B_20140904T155734_20140904T16124		Power scaling error	There has been an error in the scaling of the L1B waveform
CS_OFFL_SIR_IOP_1B_20140904T203145_20140904T20374	46_B001	Power scaling error	There has been an error in the scaling of the L1B waveform
4.6 L1B Waveform Group Data Check			
CryoSat L1B data includes a waveform data flag (field 65) for each measurement record. The bit value of this flag indicates any problems when set.			
Loss of Echo Flag: This flag is currently set for a large number of products over land, indicating that the tracking echo is missing.			
Number of products with errors: 40			
5. IOP Level 2 Data Quality Check			
5.1 L2 Product Format Check			
		the survival of both on MAII booston file (11	
Each product, retrieved and unpacked from the science server, Number of products with errors: 0	, is checked to ensure	It consists of doth an XML header file (.H	
5.2 L2 Product Header Analysis			
For all products, a series of pre-defined checks are performed on the MPH and SPH in order to identify any inconsistencies and/or errors raised by the ground-segment processing chain.			
Number of products with errors: 0			
5.3 L2 Auxiliary Data File Usage Check			
Each product is checked for missing Data Set Descriptors with respect to a pre-determined baseline and also to check the validity of Auxiliary Data Files is correct.			
Number of products with errors: 0			
5.4 L2 Measurement Confidence Data Check			
CryoSat L2 data includes a quality flag (field 14) for each 20-Hz measurement record. The bit value of this flag is an assessment of the measurement quality by the processing chains.			
Number of products with errors: 1			
Product		Test Failed	Description
CS_OFFL_SIR_IOP_220140904T155734_20140904T16124	40_B001	Power scaling error	There has been an error in the scaling of the L1B waveform
5.5 L2 Range Measurement Check			
Each product is checked to detect range measurements flagged by the processing chain as missing or containing errors.			
Ocean Range Averaging Status Flag: This flag is currently set for products over land and sea ice, but this is to be expected.			
Ice Range Averaging Status Flag: This flag is currently set for some products over land and continental ice.			
Number of products with errors: 193			
5.6 L2 SWH and Backscatter Measurement Check			
Each product is checked to detect parameters related to SWH and sigma0 that are flagged by the processing chain as missing or containing errors.			
SWH Averaging Status Flag: This flag is currently set for products over land and sea ice, but this is to be expected.			

Ocean Backscatter Averaging Status Flag: This flag is currently set for products over land and sea ice, but this is to be expected.

Ice Backscatter Averaging Status Flag: This flag is currently set for some products over land and continental ice. 176

Number of products with errors:
