

IDEAS+ Daily Report for IOP data:

06/04/2015

tunber of products with errors: 0 ALLIB Auxiliary Correction Error Check ato product is checked to detest auxiliary corrections flagged by the ground-station processing chain as missing or containing errors. Interest of products with errors: 0 SLILE Measurement Confidence Data Check aryosat L18 data includes a measurement confidence flag (field 12) for each measurement record. The bit value of this flag indicates any problems when set. Import of products with errors: 0 SLILE Maveform Group Data Check aryosat L18 data includes a waveform data flag (field 95) for each measurement record. The bit value of this flag indicates any problems when set. asses of Echo Flag: This flag is currenty set for a large number of products over land. Indicating that the tracking echo is missing. Import of products with errors: 0 SLICE Value 2 Data Quality Check aryosat L18 data includes a waveform data flag (field 95) for each measurement record. The bit value of this flag indicates any problems when set. asses of Echo Flag: This flag is currenty set for a large number of products over land. Indicating that the tracking echo is missing. Import of products with errors: 0 SLIP Checkel 2 Data Quality Check SLIP Auxiliary Data File Usage Check aryosat L18 data includes a performed on the MPH and SPH in order to identify any inconsistencies and/or errors raised by the ground-segment processing dual. Import of products with errors: 0 SLIP Auxiliary Data File Usage Check aryosat L2 Auxiliary Data File Usage Check aryosat L2 Data Quality Data File is is correct. Import of a missing Lata Edge (file 14) for each 20-12 measurement necord. The bit value of the lag is an assessment of the measurement quality by the processing duals. Import of products with errors: 0 SLIP Auxiliary Data File Usage Check aryosat L2 data includes a quality flag (fiel 14) for each 20-12 measurement necord. The bit value of the flag is an assessment of the measurement quality by the processing duals. Import of products with errors: 0 SLIP And Data	4.4 L1B Auxiliary Correction Error Check Each product is checked to detect auxiliary corrections flagged by the ground-station processing chain as missing or containing errors. Number of products with errors: 0 4.5 L1B Measurement Confidence Data Check CryoSat L1B data includes a measurement confidence flag (field 12) for each measurement record. The bit value of this flag indicates any problems when set. Number of products with errors: 0 4.6 L1B Waveform Group Data Check CryoSat L1B data includes a waveform data flag (field 65) for each measurement record. The bit value of this flag indicates any problems when set. CryoSat L1B data includes a waveform data flag (field 65) for each measurement record. The bit value of this flag indicates any problems when set. Loss of Echo Flag: This flag is currently set for a large number of products over land, indicating that the tracking echo is missing. Number of products with errors: 49	
LA LIB Auxiliary Correction Error Check Listh products is checked to detect auxiliary corrections flagged by the ground-station processing chain as missing or containing errors. Listhere of products with errors: 0 LIB Measurement Confidence Data Check Doysell 11 data includes an exesurement confirme. Flag (field 12) for each measurement record. The bit value of this flag indicates any problems when set. Listhere of products with errors: 0 LIB LIB Measurement Confidence Data Check Doysell 11 data includes an exesurement and flag (field 12) for each measurement record. The bit value of this flag indicates any problems when set. Liste of Erdo LIB Verofice Data Check LIB Verofice Check LIB	4.4 L1B Auxiliary Correction Error Check Each product is checked to detect auxiliary corrections flagged by the ground-station processing chain as missing or containing errors. Number of products with errors: 0 4.5 L1B Measurement Confidence Data Check CryoSat L1B data includes a measurement confidence flag (field 12) for each measurement record. The bit value of this flag indicates any problems when set. Number of products with errors: 0 4.5 L1B Waveform Group Data Check CryoSat L1B data includes a waveform data flag (field 65) for each measurement record. The bit value of this flag indicates any problems when set. coss of Echo Flag: This flag is currently set for a large number of products over land, indicating that the tracking echo is missing. Number of products with errors: 19	
and product is checked to detect auxiliary corrections flagged by the ground-station processing chain as missing or containing errors. Unrobe of products with errors: 0 St. L1B Measurement Confidence Data Check regions of the data includes a measurement confidence flag (field 12) for each measurement record. The bit value of this flag indicates any problems when set. Unrobe of products with errors: 0 St. L1B Maveform Group Data Check regions of Euko Flag; This flag is currently set for each measurement record. The bit value of this flag indicates any problems when set. 0 St. L1B Maveform Group Data Check regions of Euko Flag; This flag is currently set for a large number of products over land, indicating that the tracking echo is missing. Unrobe of products with errors: 0 St. L2 Product Format Check ach product, refereved and unpacked from the science server, is checked to ensure it consists of both an XML header flie (HDR) and a binary product flie (DBL) Unrobe of products with errors: 0 St. L2 Product Header Analysis or all products, a setles of pre-defined checks are performed on the MPH and SPH in order to identify any inconsistencies and/or errors raised by the ground-segment processing chain. Unrobe of products with errors: 0 St. L2 Product Header Check Act L2 Measurement Confidence Data Check Act Acta Includes a quality flag (field 14) for each 20-Hz measurement record. The bit value of this flag is an assessment of the measurement quality by the processing chain. Unrope of products with errors: 0 Check Chain Check Check Act Acta Includ	ach product is checked to detect auxiliary corrections flagged by the ground-station processing chain as missing or containing errors. umber of products with errors: 0 S.5 L1B Measurement Confidence Data Check tryoSat L1B data includes a measurement confidence flag (field 12) for each measurement record. The bit value of this flag indicates any problems when set. umber of products with errors: 0 S.6 L1B Waveform Group Data Check tryoSat L1B data includes a waveform data flag (field 65) for each measurement record. The bit value of this flag indicates any problems when set. oss of Echo Flag: This flag is currently set for a large number of products over land, indicating that the tracking echo is missing. umber of products with errors: 49	
umber of products with errors: 0 5.151 BM Gessurement Confidence Data Check try Set L18 data includes a measurement confidence flag (field 12) for each measurement record. The bit value of this flag indicates any problems when set. 6.15.151 Masser of products with errors: 6.15.151 Masser of products with errors: 7.151 Flag is currently set for a large number of products over land. indicating that the tacking echo is missing. Lumber of products with errors: 7.151 Flag is currently set for a large number of products over land. indicating that the tacking echo is missing. Lumber of products with errors: 7.151 Flag is currently set for a large number of products over land. indicating that the tacking echo is missing. Lumber of products with errors: 7.151 Flag is currently set for a large number of products over land. indicating that the tacking echo is missing. Lumber of products with errors: 7.151 Flag is currently set for a large number of products over land. indicating that the tacking echo is missing. Lumber of products with errors: 7.151 Flag is currently set for a large number of products over land. indicating that the tacking echo is missing. Lumber of products with errors: 7.151 Flag is currently set for broked lo ensure it consists of both an XML header fle (HDR) and a binary product fle (DBL). Lumber of products with errors: 7.151 Flag is currently set for products over land. 1.15 L2 L2 Droduct Header Analysis Torolating Data Set Descriptors with respect to a pre-determined baseline and also to check the validity of Auxiliary Data Flies is correct. Lumber of products with errors: 7.15 L2 Assert Measurement Confidence Data Check 1.15 L2 State Measurement Confidence Data Check Late and products a validity lag (field 14) for each 20-Hz measurement record. The bit value of this fla	Image: Second	
	A.S L1B Measurement Confidence Data Check ryoSat L1B data includes a measurement confidence flag (field 12) for each measurement record. The bit value of this flag indicates any problems when set. umber of products with errors: 0 I.B L1B Waveform Group Data Check ryoSat L1B data includes a waveform data flag (field 65) for each measurement record. The bit value of this flag indicates any problems when set. oss of Echo Flag: This flag is currently set for a large number of products over land, indicating that the tracking echo is missing. umber of products with errors: 49	
by Sit L1 B data includes a measurement confidence flag (field 12) for each measurement record. The bit value of this flag indicates any problems when set. by Sit L1B data includes a waveform data flag (field 65) for each measurement record. The bit value of this flag indicates any problems when set. case of Echo Flag: This flag is currently set for a large number of products over iand, indicating that the tracking echo is missing. burber of products with errors: efg clip L2 Product Format Check ach products with errors: efg clip L2 Product Format Check clip L2 Product Header Analysis clip L2 Product Header Analysis clip L2 Product B one defined dhecks are performed on the MPH and SPH in order to identify any inconsistencies and/or errors raised by the ground-segment processing chain. burber of products, as ensies of pre-defined checks are performed on the MPH and SPH in order to identify any inconsistencies and/or errors raised by the ground-segment processing chain. burber of products with errors: 0 clip L2 Product Header Analysis clip L2 Product Header Analysis clip L2 Product Secure Ties (H2) for each 20+1/2 measurement record. The bit value of this flag is an assessment of the measurement quality by the processing chains. clip L2 Products with errors: 0 clip L2 Product Secure L2 clip L2 Product Secure L2 clip L2 Product Secure L2 clip L2 Product Mith errors: 0 clip L2 Product Mith erro	CryoSat L1B data includes a measurement confidence flag (field 12) for each measurement record. The bit value of this flag indicates any problems when set. Iumber of products with errors: 0 CryoSat L1B data includes a waveform Group Data Check CryoSat L1B data includes a waveform data flag (field 65) for each measurement record. The bit value of this flag indicates any problems when set. CryoSat L1B data includes a waveform data flag (field 65) for each measurement record. The bit value of this flag indicates any problems when set. Construction of the bit value of this flag indicates any problems when set. Construction of the bit value of this flag indicates any problems when set. Construction of the bit value of this flag indicates any problems when set. Construction of the bit value of the tracking echo is missing. Construction of the bit value of the tracking echo is missing. Construction of the tracking echo is missing.	
bit det of products with errors: bit deta includes a waveform data flag (field 65) for each measurement record. The bit value of this flag indicates any problems when set. bit deta includes a waveform data flag (field 65) for each measurement record. The bit value of this flag indicates any problems when set. bit deta includes a waveform data flag (field 65) for each measurement record. The bit value of this flag indicates any problems when set. bit deta includes a waveform data flag (field 65) for each measurement record. The bit value of this flag indicates any problems when set. bit deta includes a waveform data flag (field 65) for each measurement record. The bit value of this flag indicates any problems when set. bit deta includes a waveform data flag (field 65) for each measurement record. The bit value of this flag is an assessment of the measurement quality by the processing chains. bit of products with errors: bit deta includes a quality flag (field 14) for each 20-Hz measurement record. The bit value of this flag is an assessment of the measurement quality by the processing chains. bit of products with errors: bit of products with errors: bit deta includes a quality flag (field 14) for each 20-Hz measurement record. The bit value of this flag is an assessment of the measurement quality by the processing chains. bit of products with errors: bit deta includes a quality flag (field 14) for each 20-Hz measurement record. The bit value of this flag is an assessment of the measurement quality by the processing chains. bit of products with errors: bit	umber of products with errors: 0 .6 L1B Waveform Group Data Check ryoSat L1B data includes a waveform data flag (field 65) for each measurement record.
