| <complex-block><complex-block></complex-block></complex-block> | 04-May-2015 None | | | |
| Image: State Stat | Global | Coverage (north pole view) | Global Covers | age (south pole view) |
| SIRAL instrument configuration for the day of acquisition is provided below. SIRAL instrument(s) in use: SIRAL - A 4. IOP Level 1B Data Quality Check IL1B Product Format Check Ich product, retrieved and unpacked from the science server, is checked to ensure it consists of both an XML header file (.HDR) and a binary product file (.DBL). umber of products with errors: | | | Global Coverage | LRM |
| SIRAL instrument(s) in use: SIRAL - A 4. IOP Level 1B Data Quality Check A. IOP Level 1B Data Quality Check At the product Format Check ach product, retrieved and unpacked from the science server, is checked to ensure it consists of both an XML header file (.HDR) and a binary product file (.DBL). amber of products with errors: 0 | | | Instrument Configuration | |
| Level 1B Data Quality Check I L1B Product Format Check Ich product, retrieved and unpacked from the science server, is checked to ensure it consists of both an XML header file (.HDR) and a binary product file (.DBL). Index of products with errors: | e SIRAL instrument configurati | on for the day of acquisition is provided below. | | |
| .1 L1B Product Format Check ach product, retrieved and unpacked from the science server, is checked to ensure it consists of both an XML header file (.HDR) and a binary product file (.DBL). umber of products with errors: 0 | SIRAL instrument(s) in u | JSE: SIRAL - A | | |
| ach product, retrieved and unpacked from the science server, is checked to ensure it consists of both an XML header file (.HDR) and a binary product file (.DBL). Imber of products with errors: 0 | | 4. IOP | Level 1B Data Quality Check | |
| Imber of products with errors: 0 | 1 L1B Product Form | at Check | | |
| | ach product, retrieved and unpa | cked from the science server, is checked to ens | ure it consists of both an XML header file (.HDR) and a binary | product file (.DBL). |
| 2 L1B Product Header Analysis | umber of products with errors | s: 0 | | |
| | | | | |

| 4.3 L1B Auxilary Data File Usage Check | | | | | |
|--|-----------------------------------|---|--|--|--|
| Each product is checked for missing Data Set Descriptors with repsect to a pre-det Number of products with errors: 0 | termined baseline and also to | check the validity of Auxiliary Data Files is correct. | | | |
| 4.4 L1B Auxiliary Correction Error Check | | | | | |
| Each product is checked to detect auxiliary corrections flagged by the ground-stati Number of products with errors: 0 | on processing chain as missi | ng or containing errors. | | | |
| 4.5 L1B Measurement Confidence Data Check | | | | | |
| CryoSat L1B data includes a measurement confidence flag (field 12) for each measurement of products with errors: 1 | asurement record. The bit valu | e of this flag indicates any problems when set. | | | |
| Product | Test Failed | Description | | | |
| CS_OFFL_SIR_IOP_1B_20150504T191810_20150504T192017_B001 | Power scaling error | There has been an error in the scaling of the L1B waveform | | | |
| 4.6 L1B Waveform Group Data Check | | | | | |
| CryoSat L1B data includes a waveform data flag (field 65) for each measurement r | record. The bit value of this fla | g indicates any problems when set. | | | |
| Loss of Echo Flag: This flag is currently set for a large number of products over la | and, indicating that the trackir | g echo is missing. | | | |
| Number of products with errors: 54 | - | | | | |
| 5. IOP | Level 2 Data Qua | ality Check | | | |
| 5.1 L2 Product Format Check | | | | | |
| Each product, retrieved and unpacked from the science server, is checked to ensu Number of products with errors: 0 | re it consists of both an XML | header file (.HDR) and a binary product file (.DBL) | | | |
| 5.2 L2 Product Header Analysis | | | | | |
| For all products, a series of pre-defined checks are performed on the MPH and SP | PH in order to identify any inco | nsistencies and/or errors raised by the ground-segment processing chain | | | |
| Number of products with errors: 0 | | | | | |
| 5.3 L2 Auxiliary Data File Usage Check | | | | | |
| Each product is checked for missing Data Set Descriptors with respect to a pre-de | termined baseline and also to | check the validity of Auxiliary Data Files is correct. | | | |
| Number of products with errors: 0 | | | | | |
| 5.4 L2 Measurement Confidence Data Check | | | | | |
| CryoSat L2 data includes a quality flag (field 14) for each 20-Hz measurement record. The bit value of this flag is an assessment of the measurement quality by the processing chains. | | | | | |
| Number of products with errors: 0 | | | | | |
| 5.5 L2 Range Measurement Check | | | | | |
| Each product is checked to detect range measurements flagged by the processing | g chain as missing or containir | ig errors. | | | |
| Ocean Range Averaging Status Flag: This flag is currently set for products over | land and sea ice, but this is to | be expected. | | | |
| Ice Range Averaging Status Flag: This flag is currently set for some products ov | er land and continental ice. | | | | |
| Number of products with errors: 247 | | | | | |
| 5.6 L2 SWH and Backscatter Measurement Check | | | | | |
| Each product is checked to detect parameters related to SWH and sigma0 that are | e flagged by the processing ch | ain as missing or containing errors. | | | |
| SWH Averaging Status Flag: This flag is currently set for products over land and sea ice, but this is to be expected. | | | | | |
| Ocean Backscatter Averaging Status Flag: This flag is currently set for products over land and sea ice, but this is to be expected. | | | | | |

Ice Backscatter Averaging Status Flag: This flag is currently set for some products over land and continental ice. 213

Number of products with errors:
