3. Instrument Configuration									
The SIRAL instrument configuration	n for the day of acquisition is provi	d below.							
SIRAL instrument(s) in use:	SIRAL - A								
Star Tracker(s) in use:	Star Tracker 1 & 2								
		1 Lovel 18 Data Oual	ity Chack						
4. Level 1B Data Quality Check									
4.1 L1 Product Format (
Each product, retrieved and unpact Number of products with errors:		ted to ensure it consists of both an X	ML header file (.HDR) and a proc	duct file (.DBL).					
4.2 L1B Product Header	r Analysis								
	Analysis								
For all products, a series of pre-def	ined checks are carried out on the	PH and SPH in order to identify any	inconsistencies and/or errors rais	ised by the ground-segment processing chain.					
Number of products with errors:	0								
4.3 L1B Auxilary Data F	ile Usage Check								
Each product is checked for missing	g Data Set Descriptors wrt a pre-d	ermined baseline and also to check t	he validity of Auxiliary Data Files	s is correct.					
Number of products with errors:	0								
4.4 L1B Flagged Auxilia	ry Correction Error Ch	:k							
••	-								
		und-station processing chain as miss	sing or containing errors						
Number of products with errors:	3

5.5 L2 Measurement Quality Flag Check

CryoSat L2 data includes a quality flag word (field 43) for each 20-Hz measurement record. The bit value of this flag is an assessment of the measurement quality by the ground-segment processing chains

Presently, there are several common data Quality Flag errors raised by the Level 2 products which are either expected due to changes made to the IPF processor in Baseline B or else are due to known issues with the data processors. The investigation of the known issues are on-going and are due to be resolved with the next update of the Level 2 processors. All common known issues are summarised in the list below, followed by a table highlighting any additional issues which may arise from this test.

Freeboard Error: This Quality Flag is correctly set in all products as this parameter is currently not provided in the L2 products and the Freeboard value is presently set to the default value of -9999.

SARin x-track angle error: Currently there is an on-going investigation into the high number of errors from the 'SARIn x-track Error' Quality Flag over Antarctica.

0

3

Height error and Backscatter error: It has been noted that the number of errors arising from the 'Backscatter Error' and 'Height Error' Quality Flag is much higher than expected over land areas and this is currently part of an on-going investigation by expert teams.

Number of products with errors:

6. QCC Check

The QCC is a CryoSat facility that performs a primary survey of data products immediately after production by the PDS and LTA processing facilities. A list of the tests which raised errors or warnings is provided below.

Nb. There is currently a discrepancy between the number of QCC reports and the number of products reported. This is a known issue and investigation is on-going.

Product type	Nb. Products	Nb. QCC Reports	Nb. Valid	Nb. Warnings	Nb. Errors
SIR_GDR_2A	16	14	0	14	0
SIR_LRM_1B	162	161	159	2	0
SIR_LRM_2	161	160	0	160	0
SIR_SAR_1B	139	139	0	139	0
SIR_SAR_2A	102	102	4	98	0
SIR_SIN_1B	101	101	0	101	0
SIR_SIN_2	98	98	0	98	0

Number of products with QCC errors:

6.2 Missing QCC Reports

Number of products with missing QCC reports:
