1 - Introduction

This report is based on the analysis of wave mode level-1 cross spectra (ASA_WVS_1P) products, which are the available few hours after the acquisition, on the high rate browse (BP) products and on the Module Stepping (MS) product.

2 - Summary

2.1 - Instrument Unavailability

ASAR was unavailable on 2003-10-19 09:49:41 to 2003-10-19 12:50:59.

ASAR was back to operations with the B4 tile malfunctionning in transmit with a remarkable impact on P1 and P1A pulses as well as on science data.

2.2 - Browse Visual Inspection

The dysfunctionning of the tile B4 has an impact on data, in particular on WS products where the boundaries of the subswaths are visible.

2.3 - Data Analysis

-P1 and P1A pulses present high variation on amplitude [till 5dB] depending on the row number.

3 - Module Stepping Mode

The MS mode provides an internal health check on an individual module basis.
The purpose of this mode is to identify to identify any malfunctionning modules and
to identify modules for which calibration offsets are to be applied.

Anomaly of tile B4 is visible in txH/V mode:

- ASA_MS_0PNPDK20031019_190249_000000152020_00485_08555_0066.N1

- ASA_MS_0PNPDK20031019_190109_000000152020_00485_08555_0067.N1

Gain of module 24 in tile B4 shows a drop ~30dB.

4 - Internal calibration Results

Anomaly visible on tranmsit cal pulses for the rows relative to second part of the antenna. A drop of ~5dB in P1 pulses is noticeable .

6.3 - Doppler evolution versus ANX

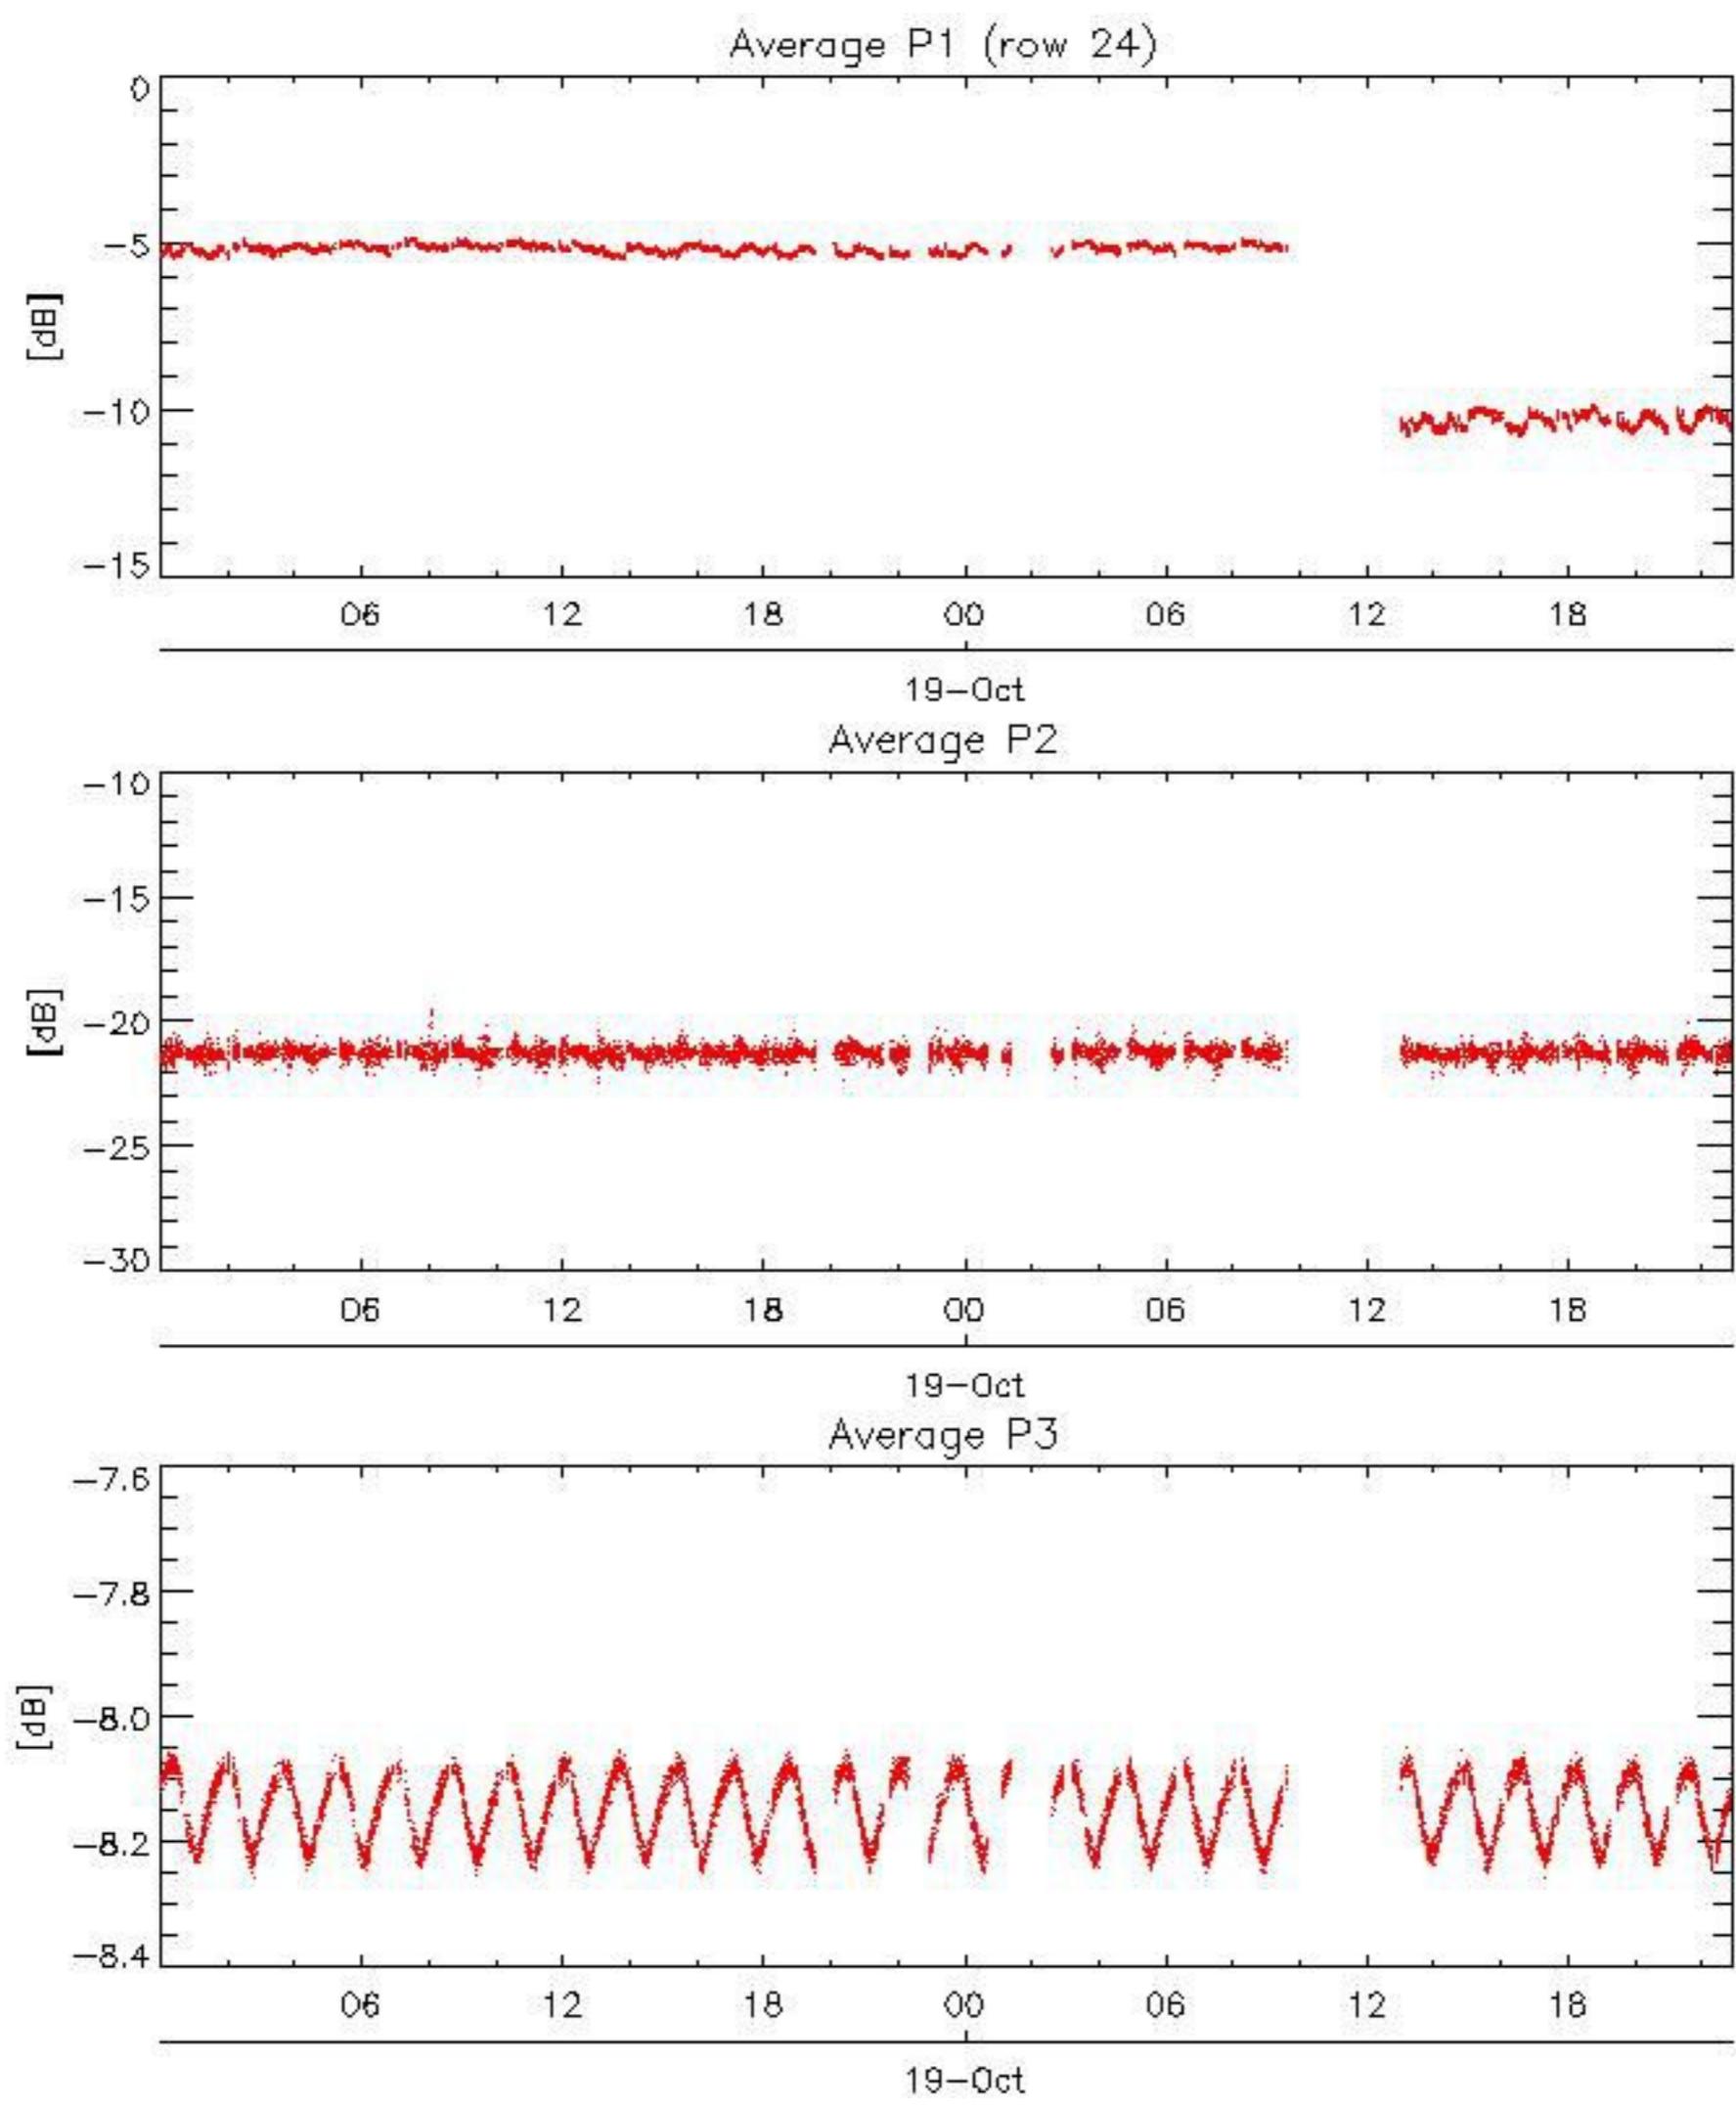

Evolution Doppler error versus ANX

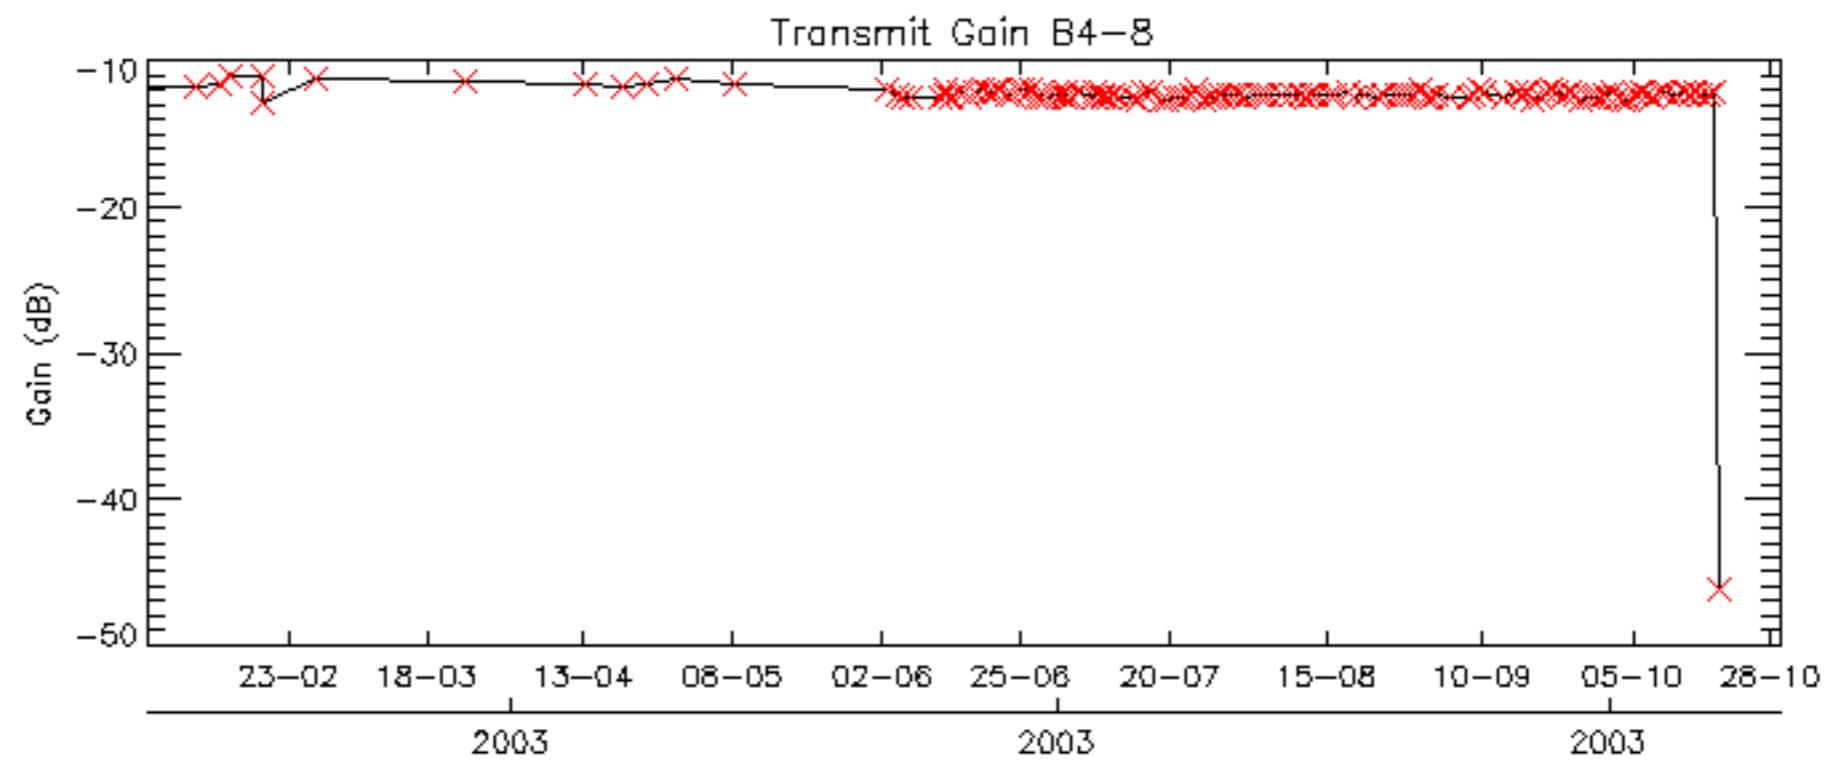

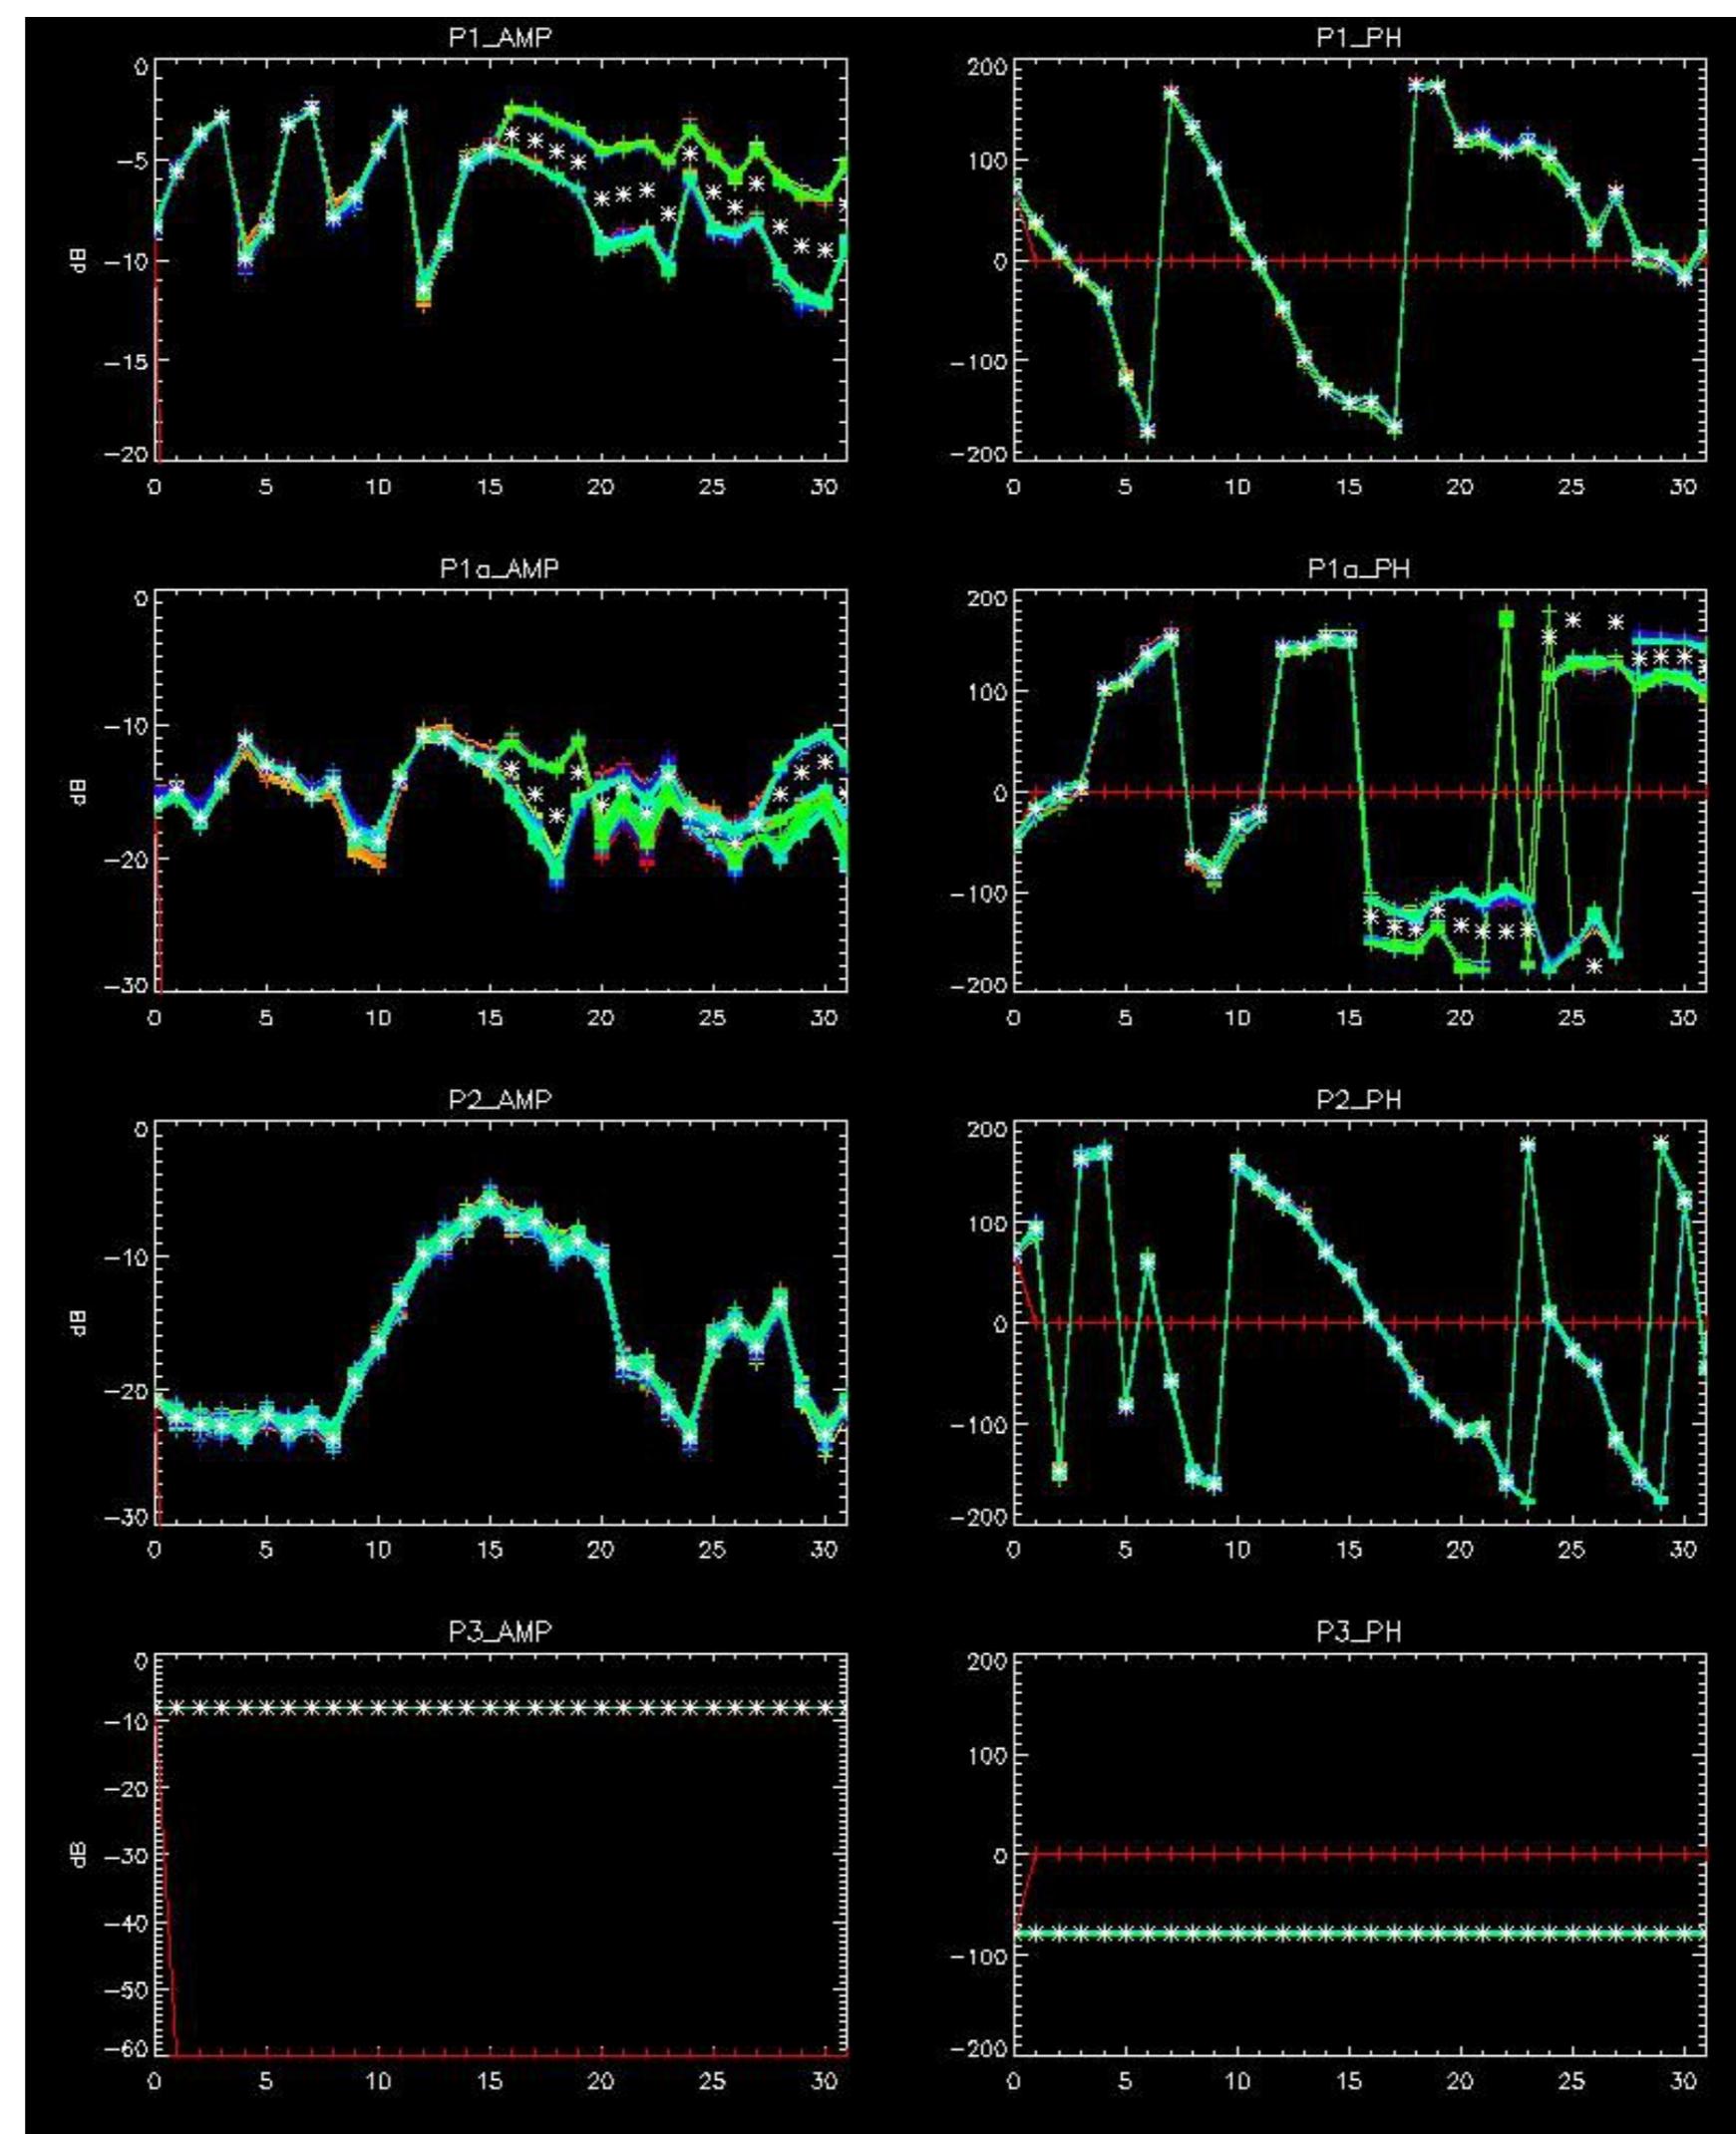

The disfunctionning of the tile B4 has an impact on data, in particular on WS products where the boundaries of the subswaths are visible.

No anomalies observed.

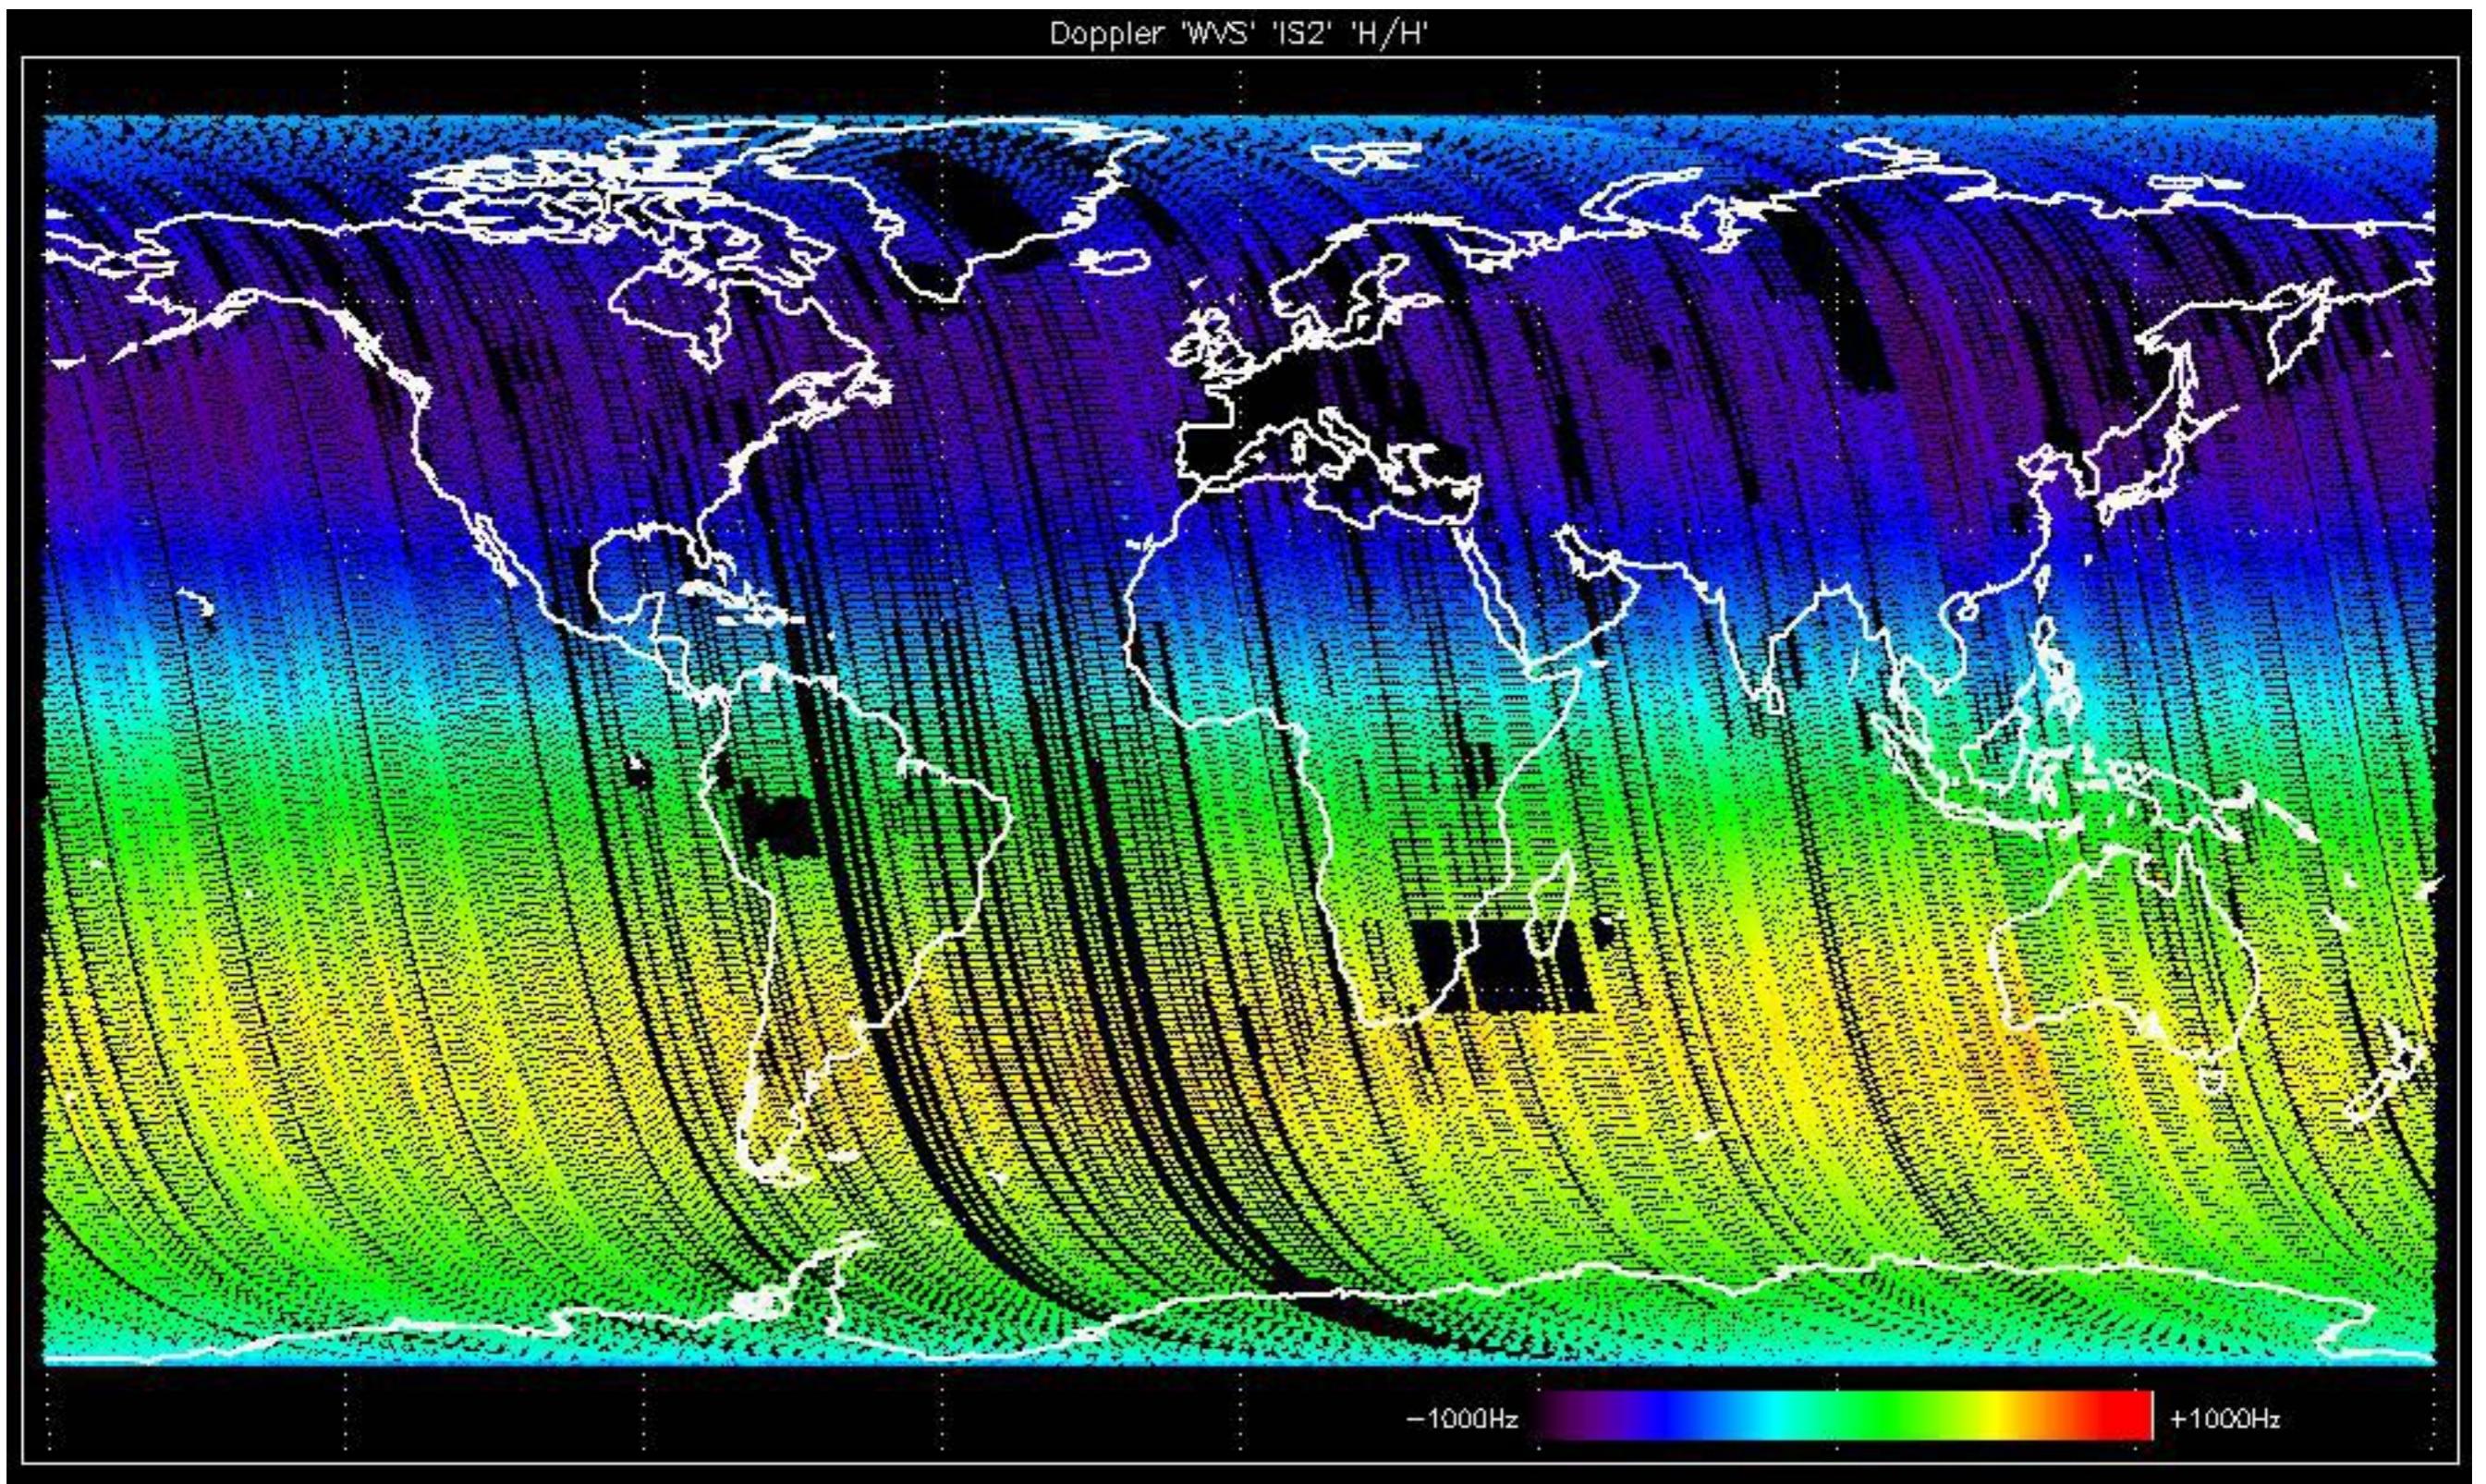

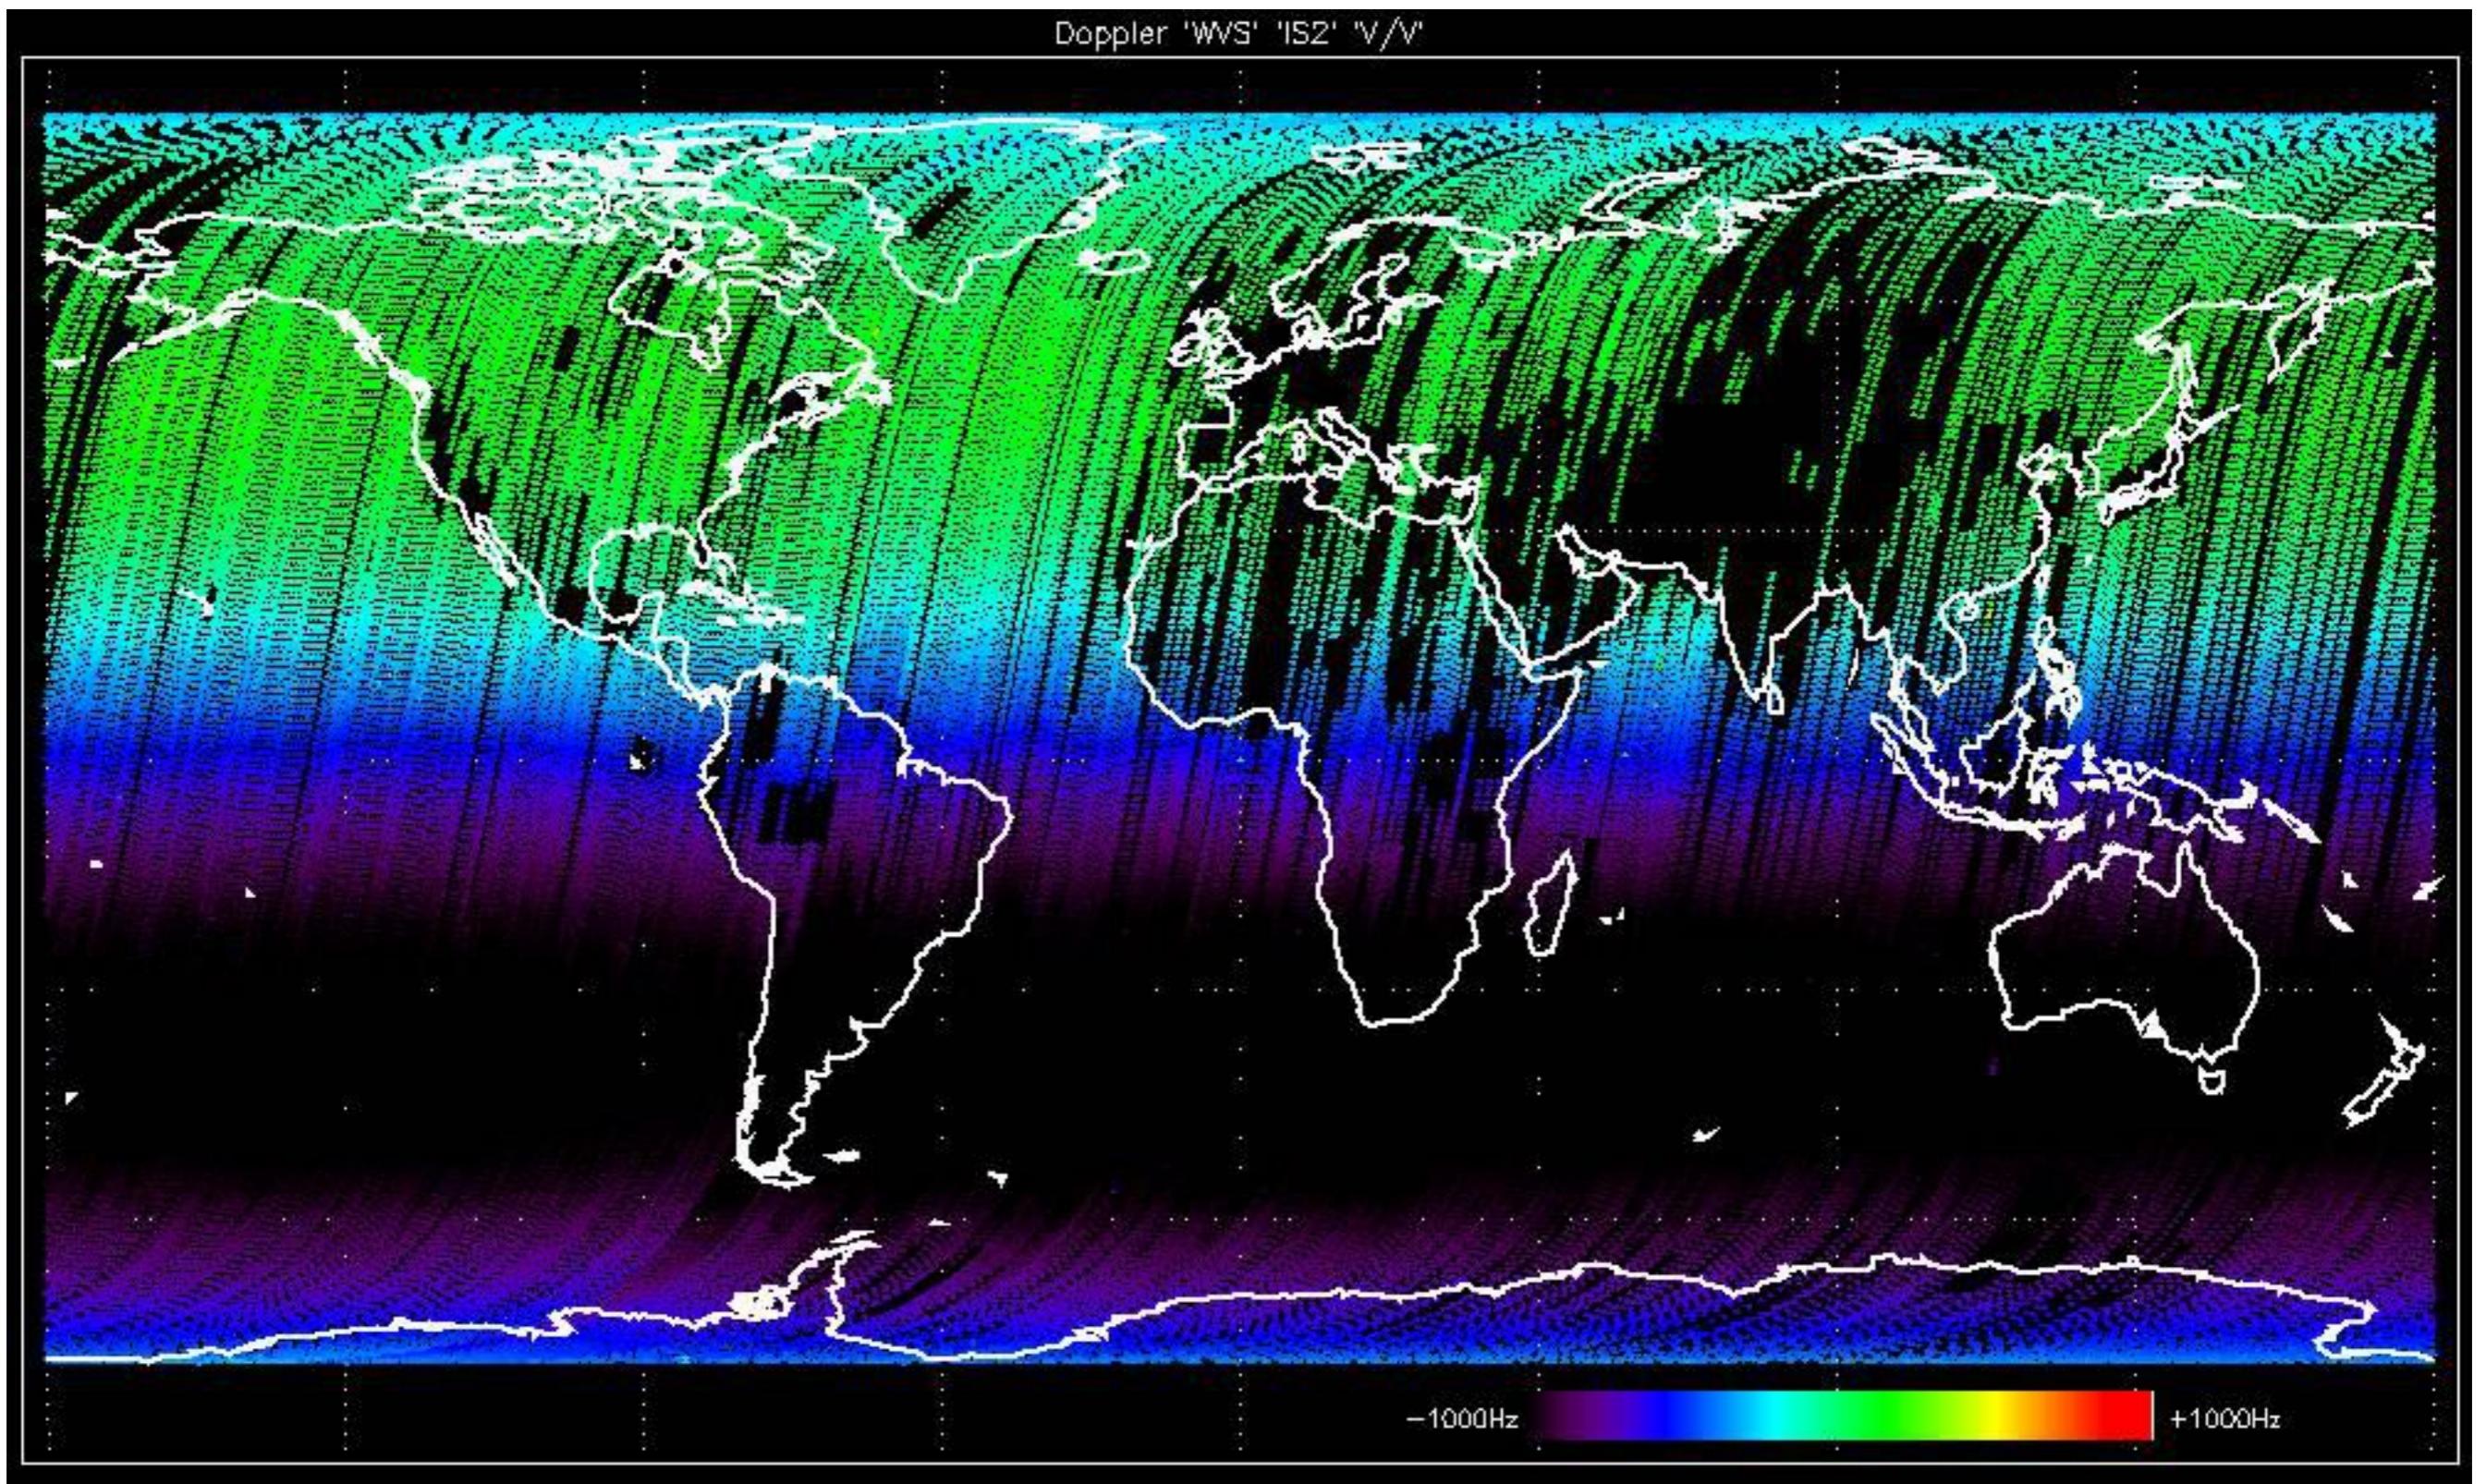

-P1 and P1A pulses present high variation on amplitude [till 5dB] depending on the row number.
-Nominal Doppler behavior.

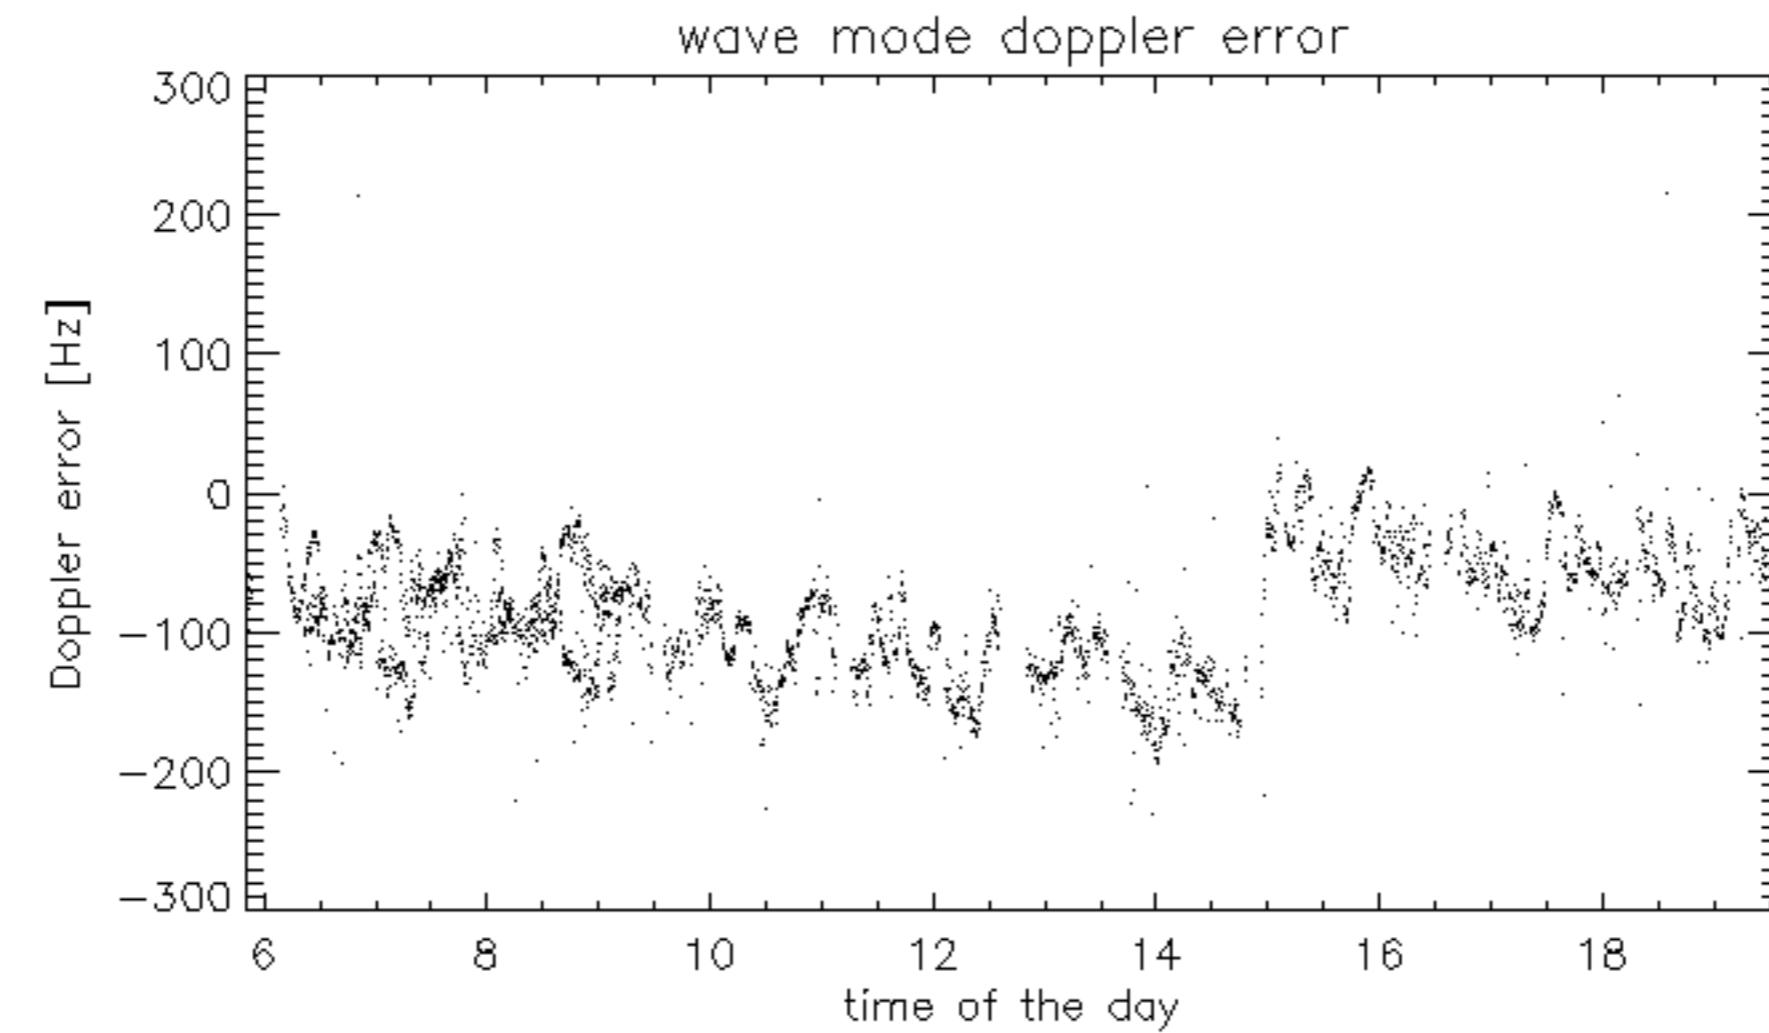

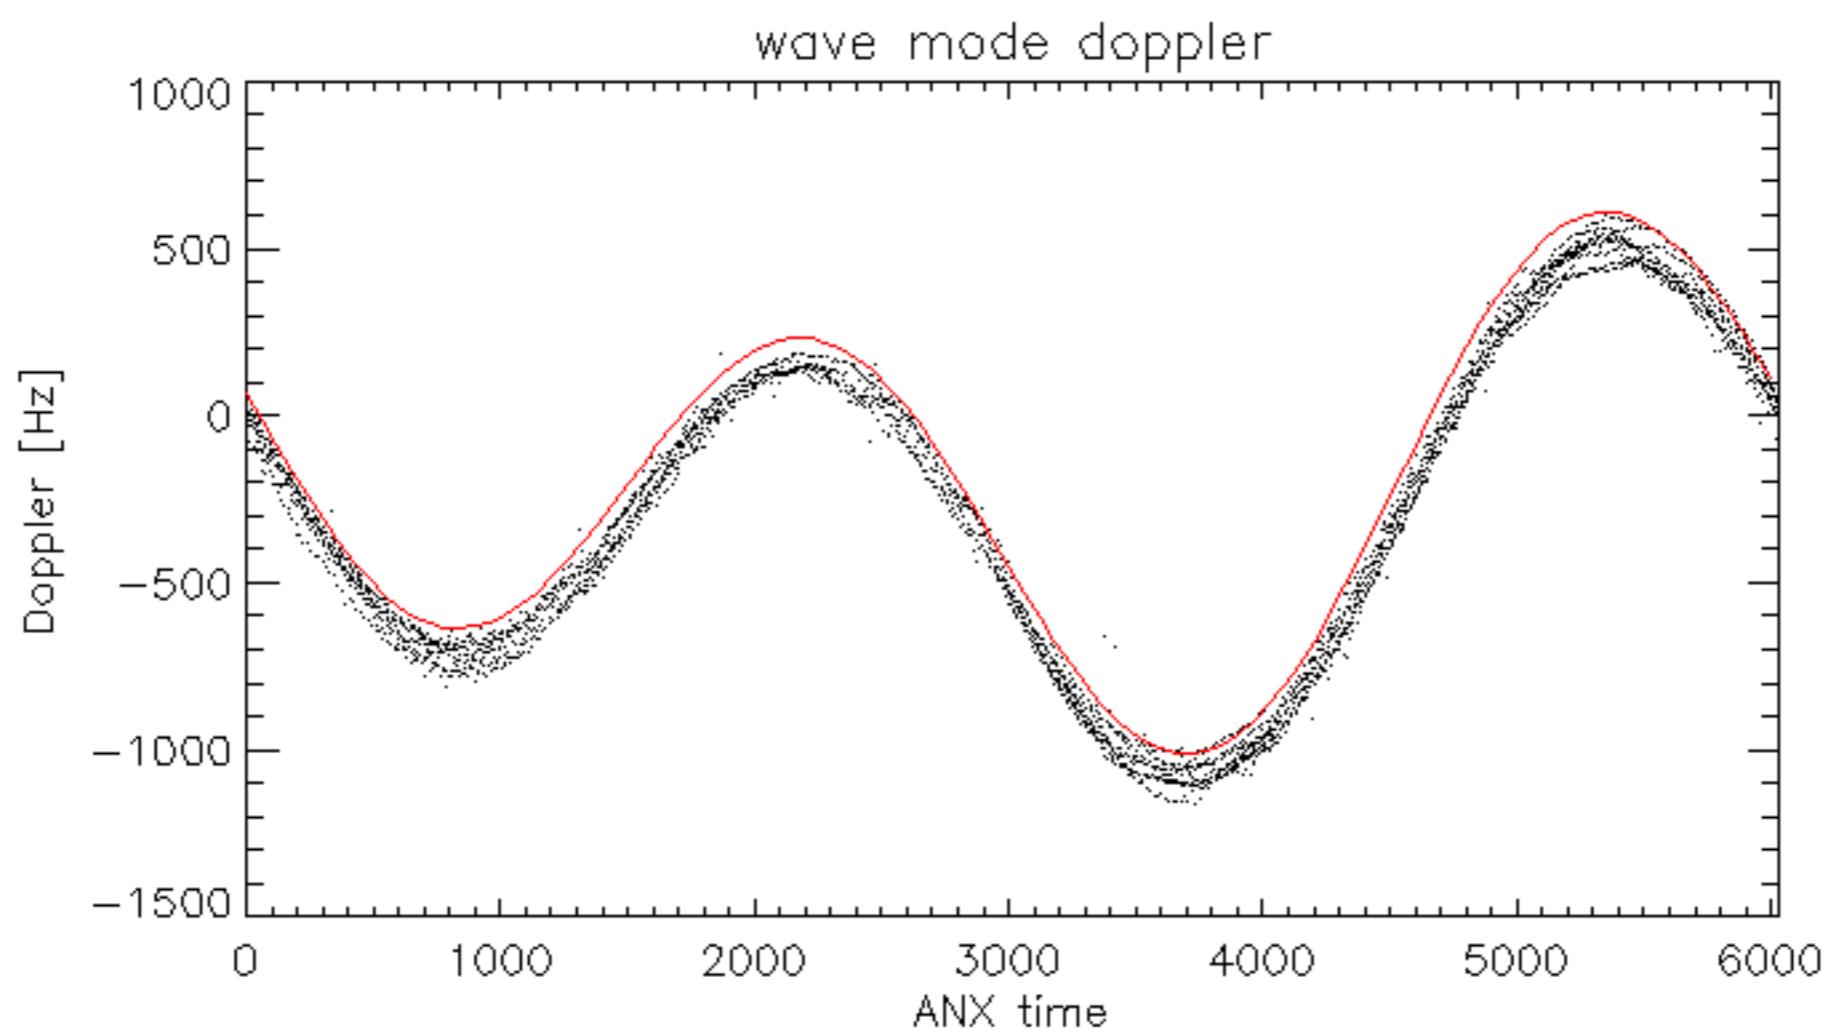

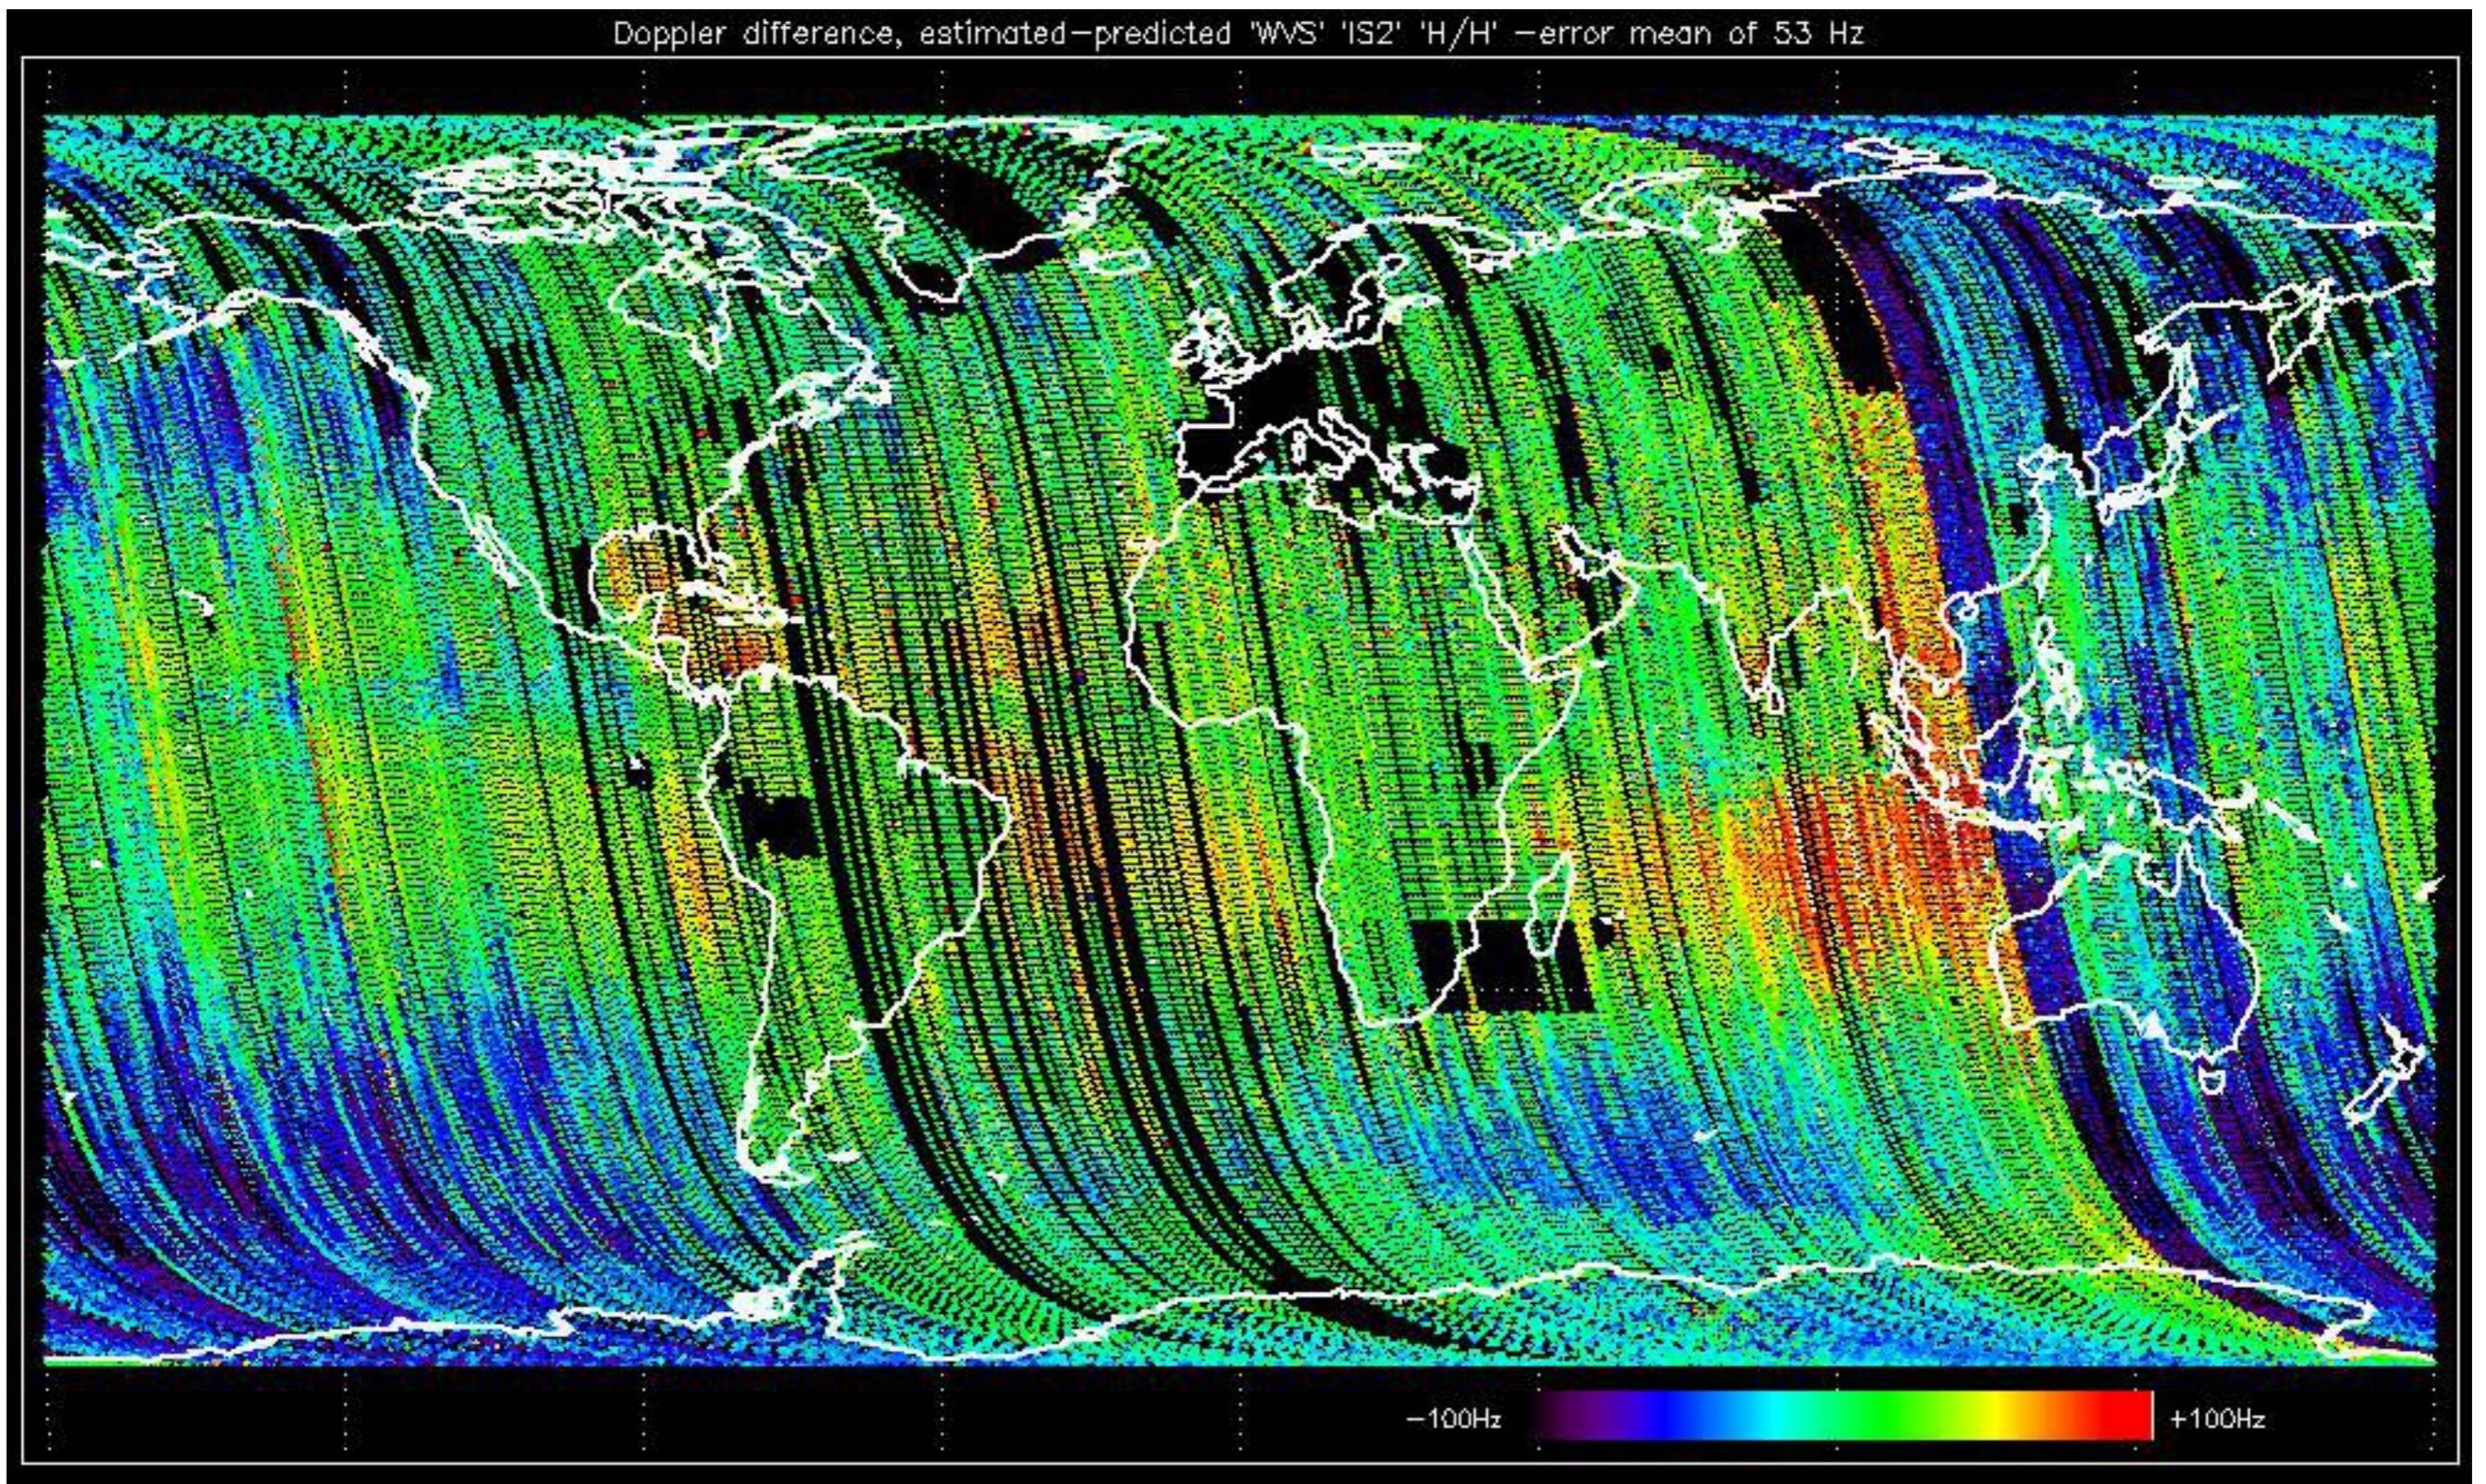

No anomalies observed Doppler evolution.
Doppler analysis performed over the last 60 days

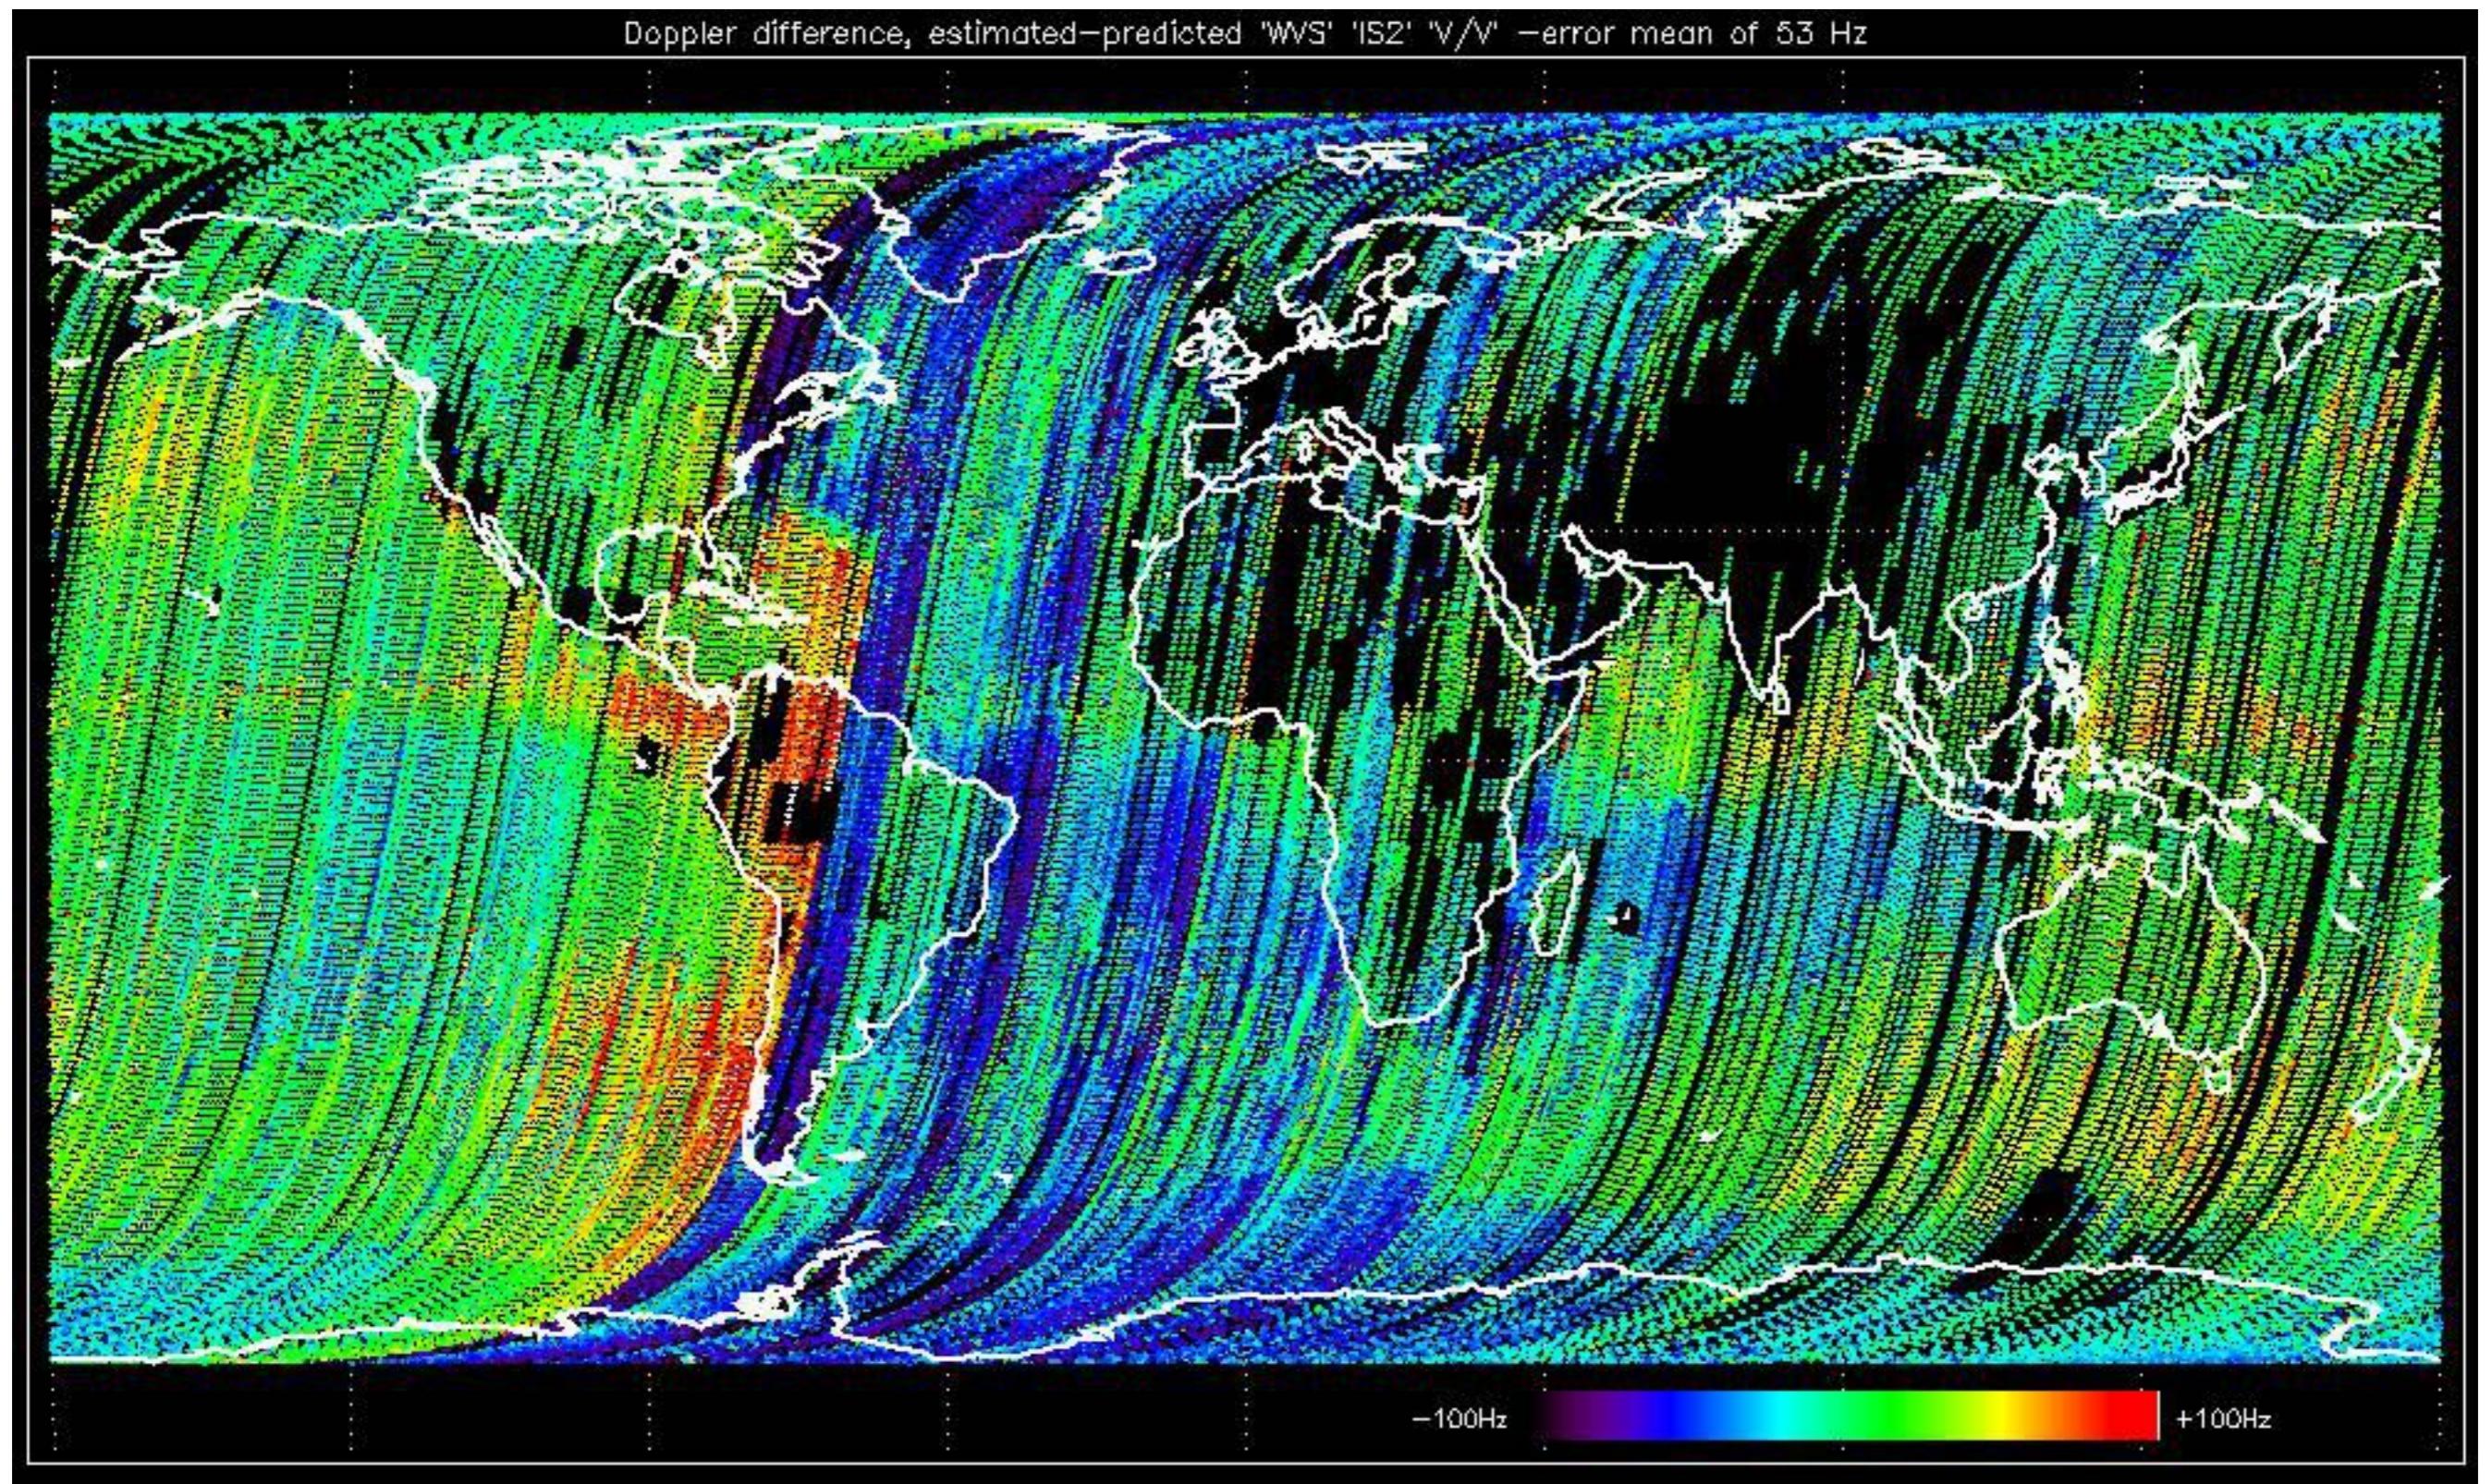

The MS mode provides an internal health check on an individual module basis.
The purpose of this mode is to identify to identify any malfunctionning modules and
to identify modules for which calibration offsets are to be applied.

Anomaly of tile B4 is visible in txH/V mode:
