2.3 - Browse Visual Inspection

No anomalies observed on available browse products related to the instrument.
 A problem has been experienced for LR products in the acquisition chain at ground station
 Corrupted products related to this problem since 25-Jan-2005.

2.4 - Data Analysis

- Stable wave internal calibration pulses gain and phase.
- Stable raw data statistics.
- Nominal Doppler behavior.
- Corrupted LR products since 25-Jan-2005 due to problems in the acquisition chain at ESRIN.

3 - Module Stepping Mode

The MS mode provides an internal health check on an individual module basis.
 The purpose of this mode is to identify any malfunctioning modules and
 to identify modules for which calibration offsets are to be applied.
 No anomalies observed on available MS products:
