

# Weekly Results from 05<sup>th</sup> August 12<sup>th</sup> August 2002

Figure 1 shows the evolution of the mean yaw (over one orbit) and its standard deviation for the period covered in this report.

During the reporting period the mean yaw evolution was stable within [-2.0, +1.55] deg. That result is similar to the one reported from the previous week.

As usual, good agreement between wave and Scatterometer results.
