

# Weekly Results from 13<sup>th</sup> January 2003 to 21<sup>st</sup> January 2003

Figure 1 shows the evolution of the mean yaw (over one orbit) and its standard deviation for the period covered in this report.

The mean yaw evolution was stable within [-2.0, +2.0] degrees during the reporting period. Note a large acquisition gap on 17-JAN-2003 and a large yaw bias on 20-JAN-2003 non due to a platform manoeuvre. No scat data available for the reported period.
