

Weekly Results from 21st January 2003 to 26th January 2003

Figure 1 shows the evolution of the mean yaw (over one orbit) and its standard deviation for the period covered in this report.

The mean yaw evolution was stable within [-2.0, +2.0] degrees during the reporting period. A manoeuvre was planned on 23-JAN-2003 that could explain the large yaw bias on orbits 40563 to 40566. No scat data available for the reported period.
