Other Temperatures B
Calibr. Lamp and Instr. Status 3 >> Solar calibration performed
                                in dump Orb. 38783
                                start of sun calibration 11:20:12
                                intensity of sun calibration:
                                ~17120 BU ->PMD2 readouts analysed with ERGO;
                                (note: due to seasonal effects nominal values
                                range between ~16000 - ~19000 BU)
Scan Mirror Motor Current
                              OK
Selected Temperature A
                              OK
                              OK
Selected Temperature B
Selected Temperature C
                              OK
Channel 1 Summation
                              OK
Channel 2 Summation
                              OK
Channel 4 Summation
                              OK
Log pages
                              OK
331/318 nm Uncal. Line Ratio
                              OK
Uncal. PMDs as RGB signal
                              OK
780 nm Uncal. Intensity
