

# 1 General Comments

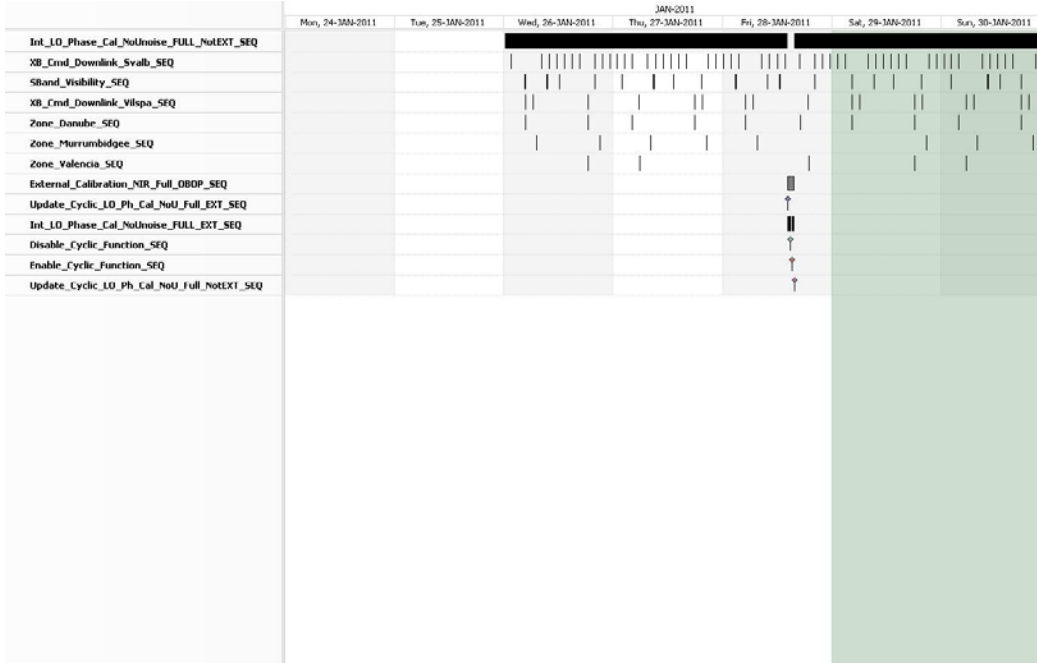

The activities scheduled for this week are those planned for the CW04.

At first, this week contained one External Calibration (NIR) on 26/01, and X\_Band passes over Svalbard and ESAC. However, what happened was that we realized that the previous ECM manoeuvre scheduled by Wednesday 26th with ETO @ 03:18 UTC would not meet the criteria required for a NIR Calibration. The reason behind was in a miss-configuration of one of the subsystems used in the weekly planning cycle.

## 2 Mission Planning Deviation

Therefore, one External Calibration (NIR) on 28/01 was again scheduled.
